

## Short bio of Prof Alfred Johny Wüest

Although, I am retired now, I am still interested to work with colleagues in African countries. I could imagine spending several months during the European wintertime in your region. If you are interested in my type of research and competence, you are welcome to contact me on [alfred.wueest@eawg.ch](mailto:alfred.wueest@eawg.ch).

Prof Alfred Johny Wüest is currently professor emeritus of the Institute of Environmental Engineering and the Limnology Center at EPFL, Lausanne, Switzerland. He was working at Eawag (Swiss Federal Institute of Aquatic Sciences) for 38 years as the head of the Aquatic Physics Laboratory and he was a member of the Eawag Directorate (2015 to 2021). For more than 30 years, he investigated with his research teams at Eawag and EPFL lakes, reservoirs and rivers in various regions, such as in Switzerland, Russia and the Sub-Saharan Africa countries of Cameroon, Congo, Rwanda and Zambia, with a strong focus on unique Lake Kivu. He focused on research, expert consulting / services and teaching on topics of Physical Limnology and Water Resources Management. He has published various book articles, several dozen expert reports and ~180 peer-reviewed papers. Details on: <http://scholar.google.ch/citations?user=hgkgsdMAAAAJ&hl=de>
