High Level Panel Discussions P-1

Keynotes K-1

1. Human-water relationships

1.1. Dialogue of knowledge: academy and traditional hydro-environment engineering knowledge

Co-occurrence of Fluoride and Arsenic in the Groundwater of the Aguascalientes Valley Aquifer, México – State of the Art 1
Roxana Nicte-Há Hughes Lomelín, Sonia Tatiana Sánchez Quispe, Mario Alberto Hernández Hernández, and Liliana García-Romero

CoDiLe – Collaborative Digital Learning 7
Leon Jänicke, Felix Schmid, James Shucksmith, Rita Fernandes de Carvalho, Saugata Datta, and Jorge Leandro

Evaluating Knowledge Management Parallel to Nature-Based Solutions-Project Marker Wadden 12
Marijn Stouten, Michael Duijn, Stéphanie IJff, Jeroen Veraart, and Lieke Hüsken

Making A Case for an Interdisciplinary Approach to Water Education Towards Sustainable Development 22
Modupe Olufunmilayo Jimoh

SARS-CoV-2 Detection in Wastewater as an Early Warning Indicator for COVID-19 Pandemic. Madrid Region Case Study 30
Antonio Lastra, Jaime Botello, and Alejandro Pinilla

A Sea to City Approaching Pattern 35
María Piedad Herrera, Jorge Martín, Pablo Arjona, Roberto Pillado, Amparo Fidel, Antonio Bayo, Juan Carlos Sánchez-Cañete, and Daniel Etreros

Assessing tap water awareness 45
Stijn Brouwer, Nicolien van Aalderen and Stef Koop

Preliminary Study of Large Wood Motion Near A Channel Confluence 52
Yuchen Zheng, Yihong Chen, Jiawei Lin, and Saiyu Yuan

©2022 IAHR. Used with permission / ISSN-L 2521-7119

1.2. Hydro-environment cultural heritage

Hydraulic Anatomy of Guadiana Springs. Part II. Hydropower Genesis 58
Pablo Doncel Fuentes

Forecasting Long-Term Effects of Climate Change on Urban Weather Comfortableness Trend (Case Study: Quebec City, Canada) 68
Hossein Bonakdari, Hamid Golabi, and Bahram Gharabghi

The Identification of Missing Elements of the Cultural, Architectural, and Natural Heritage Linked to the Urban River Monelos (Spain) 78
Amal Nnechachi Bounous, Daniel Lucas Teijeiro Mosquera, Francisco Alberto Varela García, and Puertas Agudo, Jerónimo

Water Management in Roman Times. A State of Question on Hispanic Aqueducts 86
Elena H. Sánchez López

Nympholepsy: The Role of Water in Frenzy and Other Alterate States. Nymphaea in Hispania: From Greece Caves to Moroccan Ribats 92
Flor Herrero Valdés

Cultural and landscape aspects of the Acequia Real (Royal Water Channel) of the Alhambra. Towards the recovery of a historical hidro-environmental infraestructure 96
García-Pulido, L. J., Novo Estébanez, C., Mattei, L., and Brazille Naulet, V.

Water Care Through Gamification: a discussion about its implementability 106
Elizabeth Pauline Carreño-Alvarado, Gilberto Reynoso-Meza, and Ismael Orozco-Medina

The Irrigation Systems of Jérez del Marquesado (Granada, Spain) 113
José Abellán Santisteban, Blas Ramos Rodríguez, and José María Martín Civantos

1.3. Hydro-environment engineering history

The Legacy of Hydraulic Engineering: Hidden Treasures of Asturias 122
Aitor fernández-jiménez, Víctor fernández-pacheco, Francisco j. Hurlé-castro and Eduardo álvarez-álvarez

1.4. Sustainable development goals

Caplina Aquifer, After 100 Years of Exploitation as a Sustenance for Agriculture in Arid Zones 132
Edwin Pino-Vargas

Glacier Retreat in Sibinacocha's Basin- Multi Temporal Analysis and Social Perceptions 137
Maria Paz Garcia Veramatus, Andy Alvarado, Freddy Monge, and Daniel Horna

Construction Technology and Management Practices for Nam Ngiep 1 Hydropower Plant in Lao PDR 143
Hirofumi Fujita, Shun Tasaki, Hiromitsu Terasaki, and Kunio Yamamoto

Urbanization and Sustainable Potable Water Supply: Implications for Aquifer Preservation and for Interbasin Water Transfers 150
René Autrique-Ruiz and Eduardo Rodal-Canales

Assessing water distribution systems across indicators based on Sustainable Development Goals 160
Camila Garcia, P. Amparo López-Jiménez, and Modesto Pérez-Sánchez

Assessment of Flood Mitigation Capability by Flood Resilience Index 168
Ya-Ting Chang, Yuan-Shun Chang, Hao-Che Howard Ho, and Hong-Yuan Lee

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Applying GIS to Identify Potential Location of Small Hydropower in Catchment Region 177
Han-Shen Chen, Chi-Min Hsu, Hsiang-Lin Yeh, Yu-Xuan Wang, Hao-Che Howard Ho, and Hong-Yuan Lee

Ecological water management in the Alhambra y Generalife 182
Novo Estébanez, C., Fernández Cardenete, J. R., Sánchez Gutiérrez, F. J., and López Sierra, R.

Fishing in Privatized Seas: environmental problems, local communities, and challenges for sustainability in the Colombian Caribbean 188
Johana Herrera Arango and Juan Antonio Senent-De Frutos

1.5. Gender balance, youth involvement and leadership

Youth Involvement in Small-scale Irrigation Schemes 198
Karen Parry, Alec Zuo, Henning Bjornlund, Sarah Wheeler, Andre van Rooyen, Jamie Pittock, and Makarius Mdemu

Start them early and keep them involved – Examples for Outreach Activities with Children 207
Eva Fenrich

1.6. Flood management risks from coincident calamities

Discrepancies on the Spilled Volume in the Aznalcóllar Mine Disaster 211
Marcos Sanz-Ramos, Ernest Bladé, and Josep Dolz

An Experimental Study on Characteristics of Hydraulic Stability in Shinwol Rainwater Storage and Drainage System by Continuous Flood and Air Inflow 221
Junoh Oh, Sangmi Jun, Jongjin Lee, and Changkeun Park

The Case Study of the Alluvium Affecting Funchal City (Madeira Island, Portugal): Bivariate Modelling of Short-Duration Extreme Rainfall Events 231
Lucas Rogério Gomes, Maria Manuela Portela, and Luis Angel Espinosa

2. Snow, river and sediment management

2.1. Snow assessment and impact on fluvial processes

The Effects of Climate Change on Seasonal Snowpack of Dibang River Basin of Arunachal Pradesh, India 240
A. Bhadra, A. Longkumer, L. G. Kiba, and A. Bandyopadhyay

Comparison of Different Remote Sensing Methods for Delineating Glacier Surfaces in Mago River Basin of Arunachal Pradesh 250
A. Bandyopadhyay, V. Nunchhani, T. Golom, and A. Bhadra

Defining Actual Daily Snowmelt Rates from In Situ Snow Water Equivalent Measurements 260
Steven R. Fassnacht, Antonio Juan Collados-Lara, Kan Xu, Megan G. Sears, David Pulido-Velazquez, and Enrique Morán-Tejeda

A Proposal for Studying Rain-on-Snow Events: A Case Study from SNOTEL Data in the Southern Rocky Mountains, USA 268
Enrique Morán-Tejeda, Steven R. Fassnacht, Anna K. D. Pfohl, Antonio Juan Collados Lara, Molly E. Tedesche, and David Pulido-Velazquez

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Runoff, Soil Loss and Fluvial Impact Assessment of Future Climate Scenarios in a Semi-Arid High-Mountain and Snowmelt-Driven Basin, Southern Spain 274
Cantalejo, M., Millares, A., Cobos, M., Galve, J. P., Reyes-Carmona, C., and Baquerizo, A.

The Effect of Climate Change on The Evolution of A Glacier with A Two-Phase Snow-Ice Model. Case Study of The Maladeta Glacier in The Pyrenees 281
Eduardo Lastrada, Guillermo Cobos, Francisco Javier Torrijo, and Julián Conejo

Back-Analysis of the 1986 Snow-Avalanche Event related to the Foscac Avalanche Site (Trentino – Alto Adige / Südtirol, Italy) using the Numerical Model TRENT2D 287
Stefania Sansone, Giorgio Rosatti, Daniel Zugliani, Lorenzo Giovannini, Thomas Amplatz, and Giulia Dallapozza

2.2. Sediment transport in rivers: processes, monitoring and modelling

Dynamic Development of Sediment Infiltration in an Artificial River Bed 297
Stefan Haun, Assem Mayar, Markus Noack, and Silke Wieprecht

Instability of Weakly-curved Meandering Channels 302
Sk Zeeshan Ali and Subhasish Dey

Hydrodynamics of Sediment Suspension 313
Subhasish Dey and Sk Zeeshan Ali

Experimental Study of the Effect of Vortex Motion on Bedload Transport Based on 3D Piv and Ptv 320
Hyoungchul Park and Jin Hwan Hwang

Modelling Floating Debris Transport in a Flash Flood Event 327
Yan Xiong, Qiuhua Liang, Xue Tong, Jinhai Zheng and Gang Wang

Dynamics of Forced Alternate Gravel Bars Under Unsteady Flow: An Experimental Investigation 335
Shashank Gupta, Céline Berni, and Benoit Camenen

Flow Events Seasonality in two Mountainous Watersheds with a Pluvio-nival Precipitation Regime, and Flood Risk Uncertainty (High Atlas Morocco) 344
Myriam Benkirane, Nour-Eddine Laftouhi, Agustín Millares, Marina Cantalejo, and Said Khabba

Assessing the Impact of Downward Seepage in a Sinusoidal River System 351
Jyotismita Taye and Bimlesh Kumar

Measuring Suspended Sediment Concentration in Rivers using Drone-based Hyperspectral Images 360
Siyoon Kwon and Il Won Seo

Multi-phase Modelling of Landslide-flood Cascading Hazards: A Case-study from the 2013 Great Colorado Flood 365
Diego Panici and Georgina L. Bennett

Laboratory Experiments for Channel Aggradation in Supercritical Flow 371
Alessio Radice, Barbara Zanchi, and Ehsan Heydari

Practical Estimation of Reach-Averaged Flow Resistance in Sand-bed Rivers 378
David C. Froehlich

Erosion of Cohesive Model Sediment under Turbulent Flow Studied by PIV 388
Pierre Lecostey, Guillaume Gomit, Sébastien Jarny, and Lionel Thomas

Interaction between Flow and Seepage in an Alluvial Channel 397
Anurag Sharma, Suchismita Sahoo and Mahesh Patel

Geometrical Changes in Developing Bedforms with Downward Seepage in Alluvial Channels 402
Mahesh Patel, Anurag Sharma, and Bimlesh Kumar

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Observations of Hydrodynamics and Sediment Transport in the Orinoco River 408
Carlo Gualtieri, Santiago Yepez, Mauricio Bermudez, and Alain Laraque

Numerical Modeling of 2D Transient Flows with Time and Space Varying Friction Factor and Morphological Change 419
Nilson García Ramos, and Samuel Ismael Quisca Astocahuana

Effects Of Hyper-Concentrated Sediments on Flow Resistance and Vortex Structure in an Open Channel with Large Roughness 431
Terunori Ohmoto and Kanji Adachi

Estimation of Fine Sediment Stocks in Alpine Rivers 439
Junjian Deng, Téa Piednoir, Lionel Pénard, and Benoît Camenen

Assessment of Streambank Erosion Rate Prediction in Northwest Florida, USA 449
Bryce Finch, Johan Liebens and Christopher Metcalf

Sediment Transport and Deposition in Sediment Replenished Artificial Discharges from Three Dams in the NE of Spain 455
Teresa Serra, Marianna Soler, Aina Barcelona, and Jordi Colomer

Experimental Study on Suspended Sediment Deposits over Floodplains 459
Boisson, Lorenzo, Berni, Céline, Proust, Sébastien, and Camenen, Benoît

Grain Mobility in Gravel Bed Rivers: Insight from Field Measurements 464
Alain Recking, Mohamad Nasr, Adele Johannot, and Jean-Paul Travert

Scouring Processes for Extreme Hydrological Events: Review 470
Mouldi Ben Meftah, Diana De Padova, Francesca De Serio, and Michele Mossa

Field Validation of a Multi-river Calibration Curve for Passive Acoustic Bedload Transport Monitoring 476
M. Nasr, A. Johannot, T. Geay, S. Zanker, and A. Recking

Process-Based Investigation of Turbulent Suspension Properties in Energetic Open-Channel Flows 484
Hélder Guta, David Hurther, and Julien Chauchat

Experimental Velocity Measurements of a Low-Submerged Flow Coupling RIM and PIV in a Gravel-Bedded Laboratory Flume 493
Giulia Stradiotti, Giuseppe Roberto Pisaturo, Markus Noack, and Maurizio Righetti

Coherent Structures, Sediment Entrainment and Varying Shields Numbers below Threshold Conditions of Motion 503
Johannes Schobesberger, Thomas Gold, Kevin Reiterer, Dominik Worf, Petr Lichtneger, Christoph Hauer, Helmut Habersack, and Christine Sindelar

Scour Monitoring System 510
Robert Fliszar, Gordon Gilja, Antonija Harasti, and Matej Varga

Influence of Turbulent Flow Structure on Particle Motion over a Rough Bed Consisting of Hemispherical Roughness Elements 516
Kazumasa Matsumoto, Taka-aki Okamoto, Michio Sanjou, and Tetsuya Oishi

Morphodynamical Changes at a Bifurcation Caused by a Volcano Eruption 522
Alejandro Mendoza, Gastón Priego-Hernández, Fabián Rivera-Trejo Eliseo Carrizosa, and Ramón Domínguez

Induced Sedimentation by a Control Structure in a River Bifurcation 530
René Díaz-Carvajal, Alejandro Mendoza, Fabian Rivera-Trejo, Gastón Priego-Hernández, and Moisés Berezowsky-Verduzco

Transport Prediction for Replenishment Sediment Considering Flow Resistance of Trees Measured using UAV Photo Surveying 538
Takashi Wada, Yuki Kajikawa, Hiroshi Miwa, and Akifumi Ueda

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Challenges for the Establishment of Sediment Budgets – Comparison of three Sediment Budgets in Austria 549
Sabrina Schwarz, Rolf Rindler, and Helmut Habersack

A Comparison of Different Soft Computing Techniques for the Estimation of Suspended Sediment Load in Rivers 557
Muhammad Adnan Khan, Jürgen Stamm, and Torsten Heyer

Assessment of UAV-based Photogrammetry for Bathymetry Measurements in Haiti: Comparison with Manual Surveys and Official Data 565
Rotchild Louis, Géthro Dauphin, Adermus Joseph, Nyankona Gonomy, Yves Zech, and Sandra Soares-Frazão

Determination of Time Series of Concentration and Grain Size of Suspended Sand using an Acoustic Method 575
Jessica Laible, Benoit Camenen, Jérôme Le Coz, Guillaume Dramais, Gilles Pierrefeu, and François Lauters

Dynamic Image Analysis of Clasts' Morphological Changes due to Fluvial Abrasion 582
Tamara Kuzmanić and Matjaž Mikoš

Flushing and Transport of Replenishment Sediment composed of Different Grain Sizes and their Numerical Estimation 588
Hiroshi Miwa, Takashi Wada, Yuki Kajikawa, and Mao Kinoshita

Recent Trends in Suspended Sediment Loads across the River Rhine Basin (1997-2014) 599
Tatjana Edler, Marcel van der Perk, and Hans Middelkoop

The Effects of Sea-Level Rise on Estuary Morphology In Dredged and Undredged Systems 606
Jana R. Cox, Josephien Lingbeek, Steven A. H. Weisscher, and Maarten G. Kleinhans

Integrating flow-, sediment- and instream wood-regimes during *e-flows* in the Spöl River (Swiss Alps) 611
Ruiz-Villanueva, V., Aarnink, J. A., Gibaja, J., Finch, B., and Vuaridel, M.

Modelling of Solids Distribution in Sediment Laden Open Channel Flow: Laboratory Validation 616
Václav Matoušek, Jan Krupička, Tomáš Picek, Lukáš Svoboda, and Štěpán Zrostlík

Numerical Investigation of Effect of Flow Separation on Dune Development Process 624
Jeonghu Lee and Van Thinh Nguyen

Influence of Ashes on Lateral Momentum Transfers: Experiments in a Partially Vegetated Channel 633
Cátia Taborda, Cristina Fael, César Santos, Hugo Canilho, Ana M. Ricardo, and Rui M. L. Ferreira

Width Estimator for Restored Streams (Widest). I: Model Development 640
Mario Klösch, Eddy Langendoen, Roman Dunst, and Helmut Habersack

Width Estimator for Restored Streams (Widest) II: Model Application 645
Dunst Roman, Klösch Mario, Langendoen Eddy, and Habersack Helmut

Mean flow and turbulence intensities in the free region of a flow with suspended ashes of a partially vegetated channel 650
Cristina Maria Sena Fael, César Augusto Vaz Santos, Catia Sofia Batista Taborda, Hugo Daniel Leião Canilho, Ana Margarida Ricardo, and Rui Miguel Lage Ferreira

Influence of Vertical Fluxes on the Clogging of Riverbed by Fine Sediment 659
Dubuis Romain and De Cesare Giovanni

Experimental Determination of Suspended Sediments Fractal Dimension in The Usumacinta and Grijalva Rivers, Mexico 667
Juan Antonio García Aragón, Pedro Omar Valencia Aguilar, Humberto Salinas Tapia, and Klever Izquierdo Ayala

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Pier Debris Jam Dynamics and Associated Scour 675
Wenjun Zhang, Colin D. Rennie, Ioan Nistor, and Husham Almansour

Interactive Effects of Damming, Forest Loss and Climate Change on the Hydrology of the Baleh River, Malaysia 682
Xin Yi Chong, Xin Yi Lum, Ramon J. Batalla, Damia Vericat, Alex M. Lechner, Karen Suan Ping Lee, Fang Yenn Teo, and Christopher Gibbins

Physical Scale Modelling of Torrential Hazard Events at River Confluences 691
Théo St. Pierre Ostrander, Maria Gorfer, Johannes Holzner, Andrea Andreoli, Francesco Comiti, and Bernhard Gems

Methods to evaluate sediment and driftwood laden flood – In the Akatani river flood disaster in July 2017- 701
Harada Daisuke and Shinji Egashira

A concept for analyzing the vertical dynamics of the riverbed along waterways 711
Julius Reich, Axel Winterscheid, Thomas Artz, Felix Lorenz, and Robert Weiß

Modeling of Sediment Transport Process in Drainage Basins 718
Menglu Qin, Daisuke Harada and Shinji Egashira

Acoustic Inversion for a Sontek M9 ADCP: An Application Case in Lower Uruguay River 728
Alejandro Nardin, Ricardo Szupiany, and Alejandro Arcelus

On A Reasonable, Functional Form for Bed-Load Formulas 737
Egashira Shinji, Robin K. Biswas, Harada Daisuke, and Miyamoto Kuniaki

Deriving Key Input Data for Hydraulic Modelling of Sediment Transport in an Alpine Proglacial Outwash Plain 743
Clemens Hiller, Sebastian Leistner, Lukas Walter, Kay Helfricht, Klemens Weisleitner, and Stefan Achleitner

Application of HEC-HMS for Continuous Simulation of River Discharge and Suspended Sediment in the Owenabue Catchment, County Cork, Ireland 747
Rodhraí Crowley, Leonard O' Driscoll, Bidroha Basu, Juan T. Garcia, Juan M. Garcia-Guerrero, and Joe Harrington

Hybrid Quasi-Three-Dimensional Modeling of Morphological Processes Based on Equilibrium Sediment Transport Using Lattice Boltzmann And Finite-Difference Methods 757
Khalil Machrouhi, Anass Bendaraa, My Mustapha Charafi, and Abdellatif Hasnaoui

Assessment of Long-term Morphological Changes and Sediment Dynamics in The Vietnamese Mekong Delta 766
Doan Nguyen Luyen Phuong, Doan Van Binh, Sameh A. Kantoush, Trung La Vinh, Mai Nguyen Thi Phuong, Tetsuya Sumi, and Tuan Luc Anh

Trial for Effective Sediment Runoff Control with a Movable Shutter in Joganji River 775
Koso Mikami, Tomoyuki Noro, Takahiko Nagayama, Tomohiko Furuya, Masaharu Fujita, Takahisa Mizuyama, and Takahiro Itoh

Modelling The Impact of Sediment Grain Size on Flooding in The Kathmandu Basin, Nepal 784
Saraswati Thapa, Maggie J. Creed, Hugh D. Sinclair, Simon M. Mudd, Mikael Attal, Manoranjan Muthusamy, and Bhola Nath Ghimire

What is the Current Morphological State of the River Drava? 795
Ficsor Johanna, Gradwohl-Valkay Alexandra, Pirkhoffer Ervin, and Czigány Szabolcs

Characteristics Riparian Population at Medium and Small Sized Rivers in Japan 801
Masakazu Hashimoto, Ken Ichikawa, Kaori Amaya, Andre Araujo Fortes, and Shosuke Satoh

Sediment Replenishment Along Rivers – Advection and Dispersion of Gravel Inputs 805
Kevin Reiterer, Thomas Gold, Christoph Hauer, Helmut Habersack, and Christine Sindelar

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Comprehensive Analysis of the Bottom Tracking features measured by ADCPs in Riverine Environments 814
Slaven Conevski, Massimo Guerrero, Axel Winterscheid, and Nils Ruther

2.3. Watershed erosion processes and soil conservation

Historical Land Use Change Decrease in Sediment Yield by 300% During the Past Century to be Reversed by Future Climate Change 824
Barnard G. F., Kiringu K., Basson G. R., and Vonkeman J. K.

Land Use Land Cover Changes in the Fincha Basin, Ethiopia 840
Motuma Shiferaw Regasa and Michael Nones

Sediment Yield in an Urbanized River Basin: A Case Study of Nambul River, Manipur, India 845
Victoria Ningthoujam, Ngangbam Romeji, and L. Bilashini Chanu

Scour of Sand Beds by Long and Short Impinging Jets- Similarities and Differences 854
Mahmud Rashedul Amin, Nallamuthu Rajaratnam, and David Zhu

Using Planetscope for Identification of Erosion by Water in Agricultural Landscapes 861
Josef Krása, Daniel Žížala, Jakub Staŝek, and Adam Tejkl

Sediment Transport in Vrchlice Reservoir Watershed 869
Julie Winterova, Josef Krasa, Miroslav Bauer, and Tomas Dostal

Evaluation of the effectiveness of retention measures in the landscape in various rainfall-runoff conditions 878
Barbora Jáchymová, Tomáŝ Dostál, David Zumr, Miroslav Bauer, Josef Krása, Nina Noreika, and Tailin Li

Simulation of Soil Erosion Responses to Land-Use Changes at A Catchment Scale 887
Lala Mariam Dabo, Ching-Nuo Chen, and Samkele S. Tfwala

The Influence of Rainfall Patterns on Soil Erosion and Sediment Yield in Laonung River Watershed 896
Kunene Nosizwe Haru, Ching-Nuo Chen, and Tfwala Samkele S.

2.4. River morphodynamics and hydraulic-structure effects

Secondary Currents and Turbulence over Spanwise Heterogeneous Bed Roughness 903
Qianyu Luo and Thorsten Stoesser

The Influence of Pier Shape on the Accumulations of Large Wood Debris 911
Diego Panici and Gustavo de Almeida

Flume Experiments on Downsteram Scouring due to Groundsills with Different Permeability 918
Chong-Yu Sun and Shaohua Marko Hsu

Effect of Pier Shape on Local Scour Around Bridge Pier Over Gravel Bed Under Unsteady Flow Conditions 927
Gaurav Misuriya and T. I. Eldho

Comparison of Hydrodynamic Characteristics around Different Groups of Circular Bridge Piers over Plane Rigid Bed 932
Chitrangini Sahu and Eldho T. I.

A reflectance-turbidity model to evaluate the propagation of fluvial sediment pulses following dam removals: A case study from the Elwha River, Washington, USA 938
Abhinav Sharma, Celso Castro Bolinaga, and Natalie Nelson

Do Antidune Trains Undergo Morphological Changes When These Bedforms Migrate Upstream? 946
Ivan Pascal, Patricio Bohorquez, and Christophe Ancey

©2022 IAHR. Used with permission / ISSN-L 2521-7119

River Training and Dredging Works on Critical Sectors on the Danube River in Serbia 954
Natalia Garcia Estévez, Miroslav Tomin, Karim Kam, Zoran Rasic, Lidija Andrijaŝević – Jovanović, Djordje Višić, and Ivan Mitrović

Hydraulic Experiment on Local Scour Around a Cylinder in Supercritical Flow and Its Numerical Simulation using Shallow Water Flow Model 964
Yuki Kajikawa, Takashi Wada, Masamitsu Kuroiwa, and Hiroshi Miwa

Significance of Time Dependence in The Effect of Wing Dams on Water Levels 973
Gergely T. Török and Gary Parker

Effects of an Emergent Cylinder in A Group on Water Flows and Evaluation of Hydrodynamic Force 980
Ryo Tomiyama, Tatsuhiko Uchida, Daisuke Kobayashi, Misako Hatono, and Satoshi Yokojima

Suitability of Artificial Gravel Structures as Hydraulic Measures for Low Flow Regulation in a Navigable River 988
Julian Binder, Martin Glas, Christoph Hauer, Marcel Liedermann, Helmut Habersack, and Michael Tritthart

Geometry Simulation of Stable Channel Bank Profile: A Comprehensive Comparison Between Neuro-Fuzzy and Polynomial Based Machine Learning Algorithms 994
Hossein Bonakdari, Azadeh Gholami, Isa Ebtehaj, Abdolmajid Mohammadian, Bahram Gharabaghi, and Saeed Reza Khodashenas

Analysis of River Bathymetry using Geometrical Properties of River Cross-section 1004
Joo Suk Ko, Jae Gon Park, Sunghyun Kwak, Kyungsu Lee, and Siwan Lyu

Granulometric Variety of The River Bed Along The Free-Flowing German Upper Rhine – Insights From an Extensive Sampling Campaign 1011
Elise Lifschiz and Martin Struck

The Effect of Submerged Groynes in a Near-Natural Rough Open Channel Flow 1021
Christine Sindelar, Petr Lichtneger, and Helmut Habersack

Experimental and Numerical Analysis of Idealized Large Woody Structures: Influence of the Orientation on the Drag Force 1027
Jan Peter Balmes

Impact of a Vane-Field on the Turbulence Structure of a 90° Lateral Water Diversion 1036
Joana Vaz Baltazar, Gökçen Bombar, Elsa Alves, and António Heleno Cardoso

Three-Dimensional Numerical Modeling of the Scour Process in Longitudinal Walls in Rivers with Granular Bedding 1045
Nelson Javier Cely Calixto, Melquisedec Cortés Zambrano, Alberto Galvis Castaño, and Gustavo Adolfo Carrillo Soto

Channel Incision in the Braided Reach of the Lower Yellow River in Response to the Operation of the Xiaolangdi Reservoir 1054
Jie Li, Yi Zhang, Zhehan Zhou, Minghao Chu, and Chenghao Zhu

Characterization of the Behavior of Guadalfeo River (Spain) Downstream Rules Dam Using Differential Discharge Gauging Techniques by Sections 1060
Eduardo Navarrete-Mazariegos, Fernando Rodríguez-Maldonado, Juan Carlos Gómez-Vargas, and Fernando Delgado-Ramos

Hydraulic Modeling of Braided Channels to Aid Design of Instream Structures 1067
Robert Ettema and Christopher Thornton

©2022 IAHR. Used with permission / ISSN-L 2521-7119

2.5. River sediment management, basin-scale interactions and impact on the coast

What does it Happen to Mesohabitats of an Upland Stream after a Controlled Sediment Flushing Operation? 1077
Silvia Quadroni, Alberto Doretto, Francesca Salmaso, Livia Servanzi, Giuseppe Crosa, and Paolo Espa

Application of Isotope Techniques for Assessing Hydrology of the Red River (Asia) 1085
Trinh Anh Duc and Do Thu Nga

Impact on downstream sediment transport by Sardar Sarovar Dam in Narmada River, India 1091
P. Vengadesan, S. A. Sannasiraj, and S. Murty Bhallamudi

River Danube, Niger and Mekong – Comparing the Sediment Status of Large Rivers 1099
Helmut Habersack, Beatrice Wagner, Christoph Hauer, Marcel Liedermann, Martin Glas, Marlene Haimann, Michael Krapesch, Peter Flödl, Patrick Holzapfel, Philipp Gmeiner, Sophie Stelzer, Elena Leutgöb, Nora Lasinger, Phillipp Schütz, David Lehner, Max Kainz, Martin Fuhrmann, Sabrina Scheuer, Gado Abdouramane, and Sopheap Lim

The Effect of Dunes Migration on The Maximum Scour Depth at Bridge Pier 1109
Shaolin Yue, Huan Zhou, and Rui Wang

Study on the Flocculation Effect of Dredged Mud with Flocculants for Rapid Sedimentation 1117
Wang Ruicai, Xu Weijie, Wu Teng, Qin Jie, and Tao Guilan

2.6. River conservation and restoration: nature-based solutions

A House-Like Workflow of Nature-Based Solutions to Host Resilient Aqueous Habitat 1125
Sebastian Schwindt, Gregory B. Pasternack, and Silke Wieprecht

Effect of Discharge Variations and Sediment Supply on the Stability of Artificial Step-Pool Sequences 1135
Fiona Maager, Benjamin Hohermuth, Volker Weitbrecht, and Robert M. Boes

Taming Nitrate Pollution in Urban Stream 1145
Vallo Kõrgmaa, Joonas Pärn, Salme Ruberg, and Arvo Iital

Grey, Green, and Blue Infrastructure Embedded within Existing Water Grid in the Urban Area in France 1153
Jelena Batica and Philippe Gourbesville

Water Temperature Model for Mediterranean Rivers and Climate Change, the Jucar River Case 1159
Miguel Ángel Pérez-Martín, Clara Estrela-Segrelles, Carlos Miñana-Albanell, and Carlos Mulet-Rojas

Influence of Large Wood Transport on River Bed Structuring Processes in Steep River Reaches 1166
Clara Streule, Christian Tognacca, and Giovanni De Cesare

River Restoration and Flood Protection Through Nature-Based Solutions 1173
Juan Ortas González, José María Sánchez Sanz, José Ignacio Díaz, and Caneja Nieto

The Dynamic River Landscape through Time: Natural vs. Regulated Reaches of the Odra River 1184
Adriana Holušová, Lukáš Vaverka, Zuzana Poledniková, and Tomáš Galia

2.7. Sedimentation in reservoirs

Numerical Modelling of the Suspended Sediment Transport in a Reservoir under the influence of Wind and Temperature 1192
Wendy Gonzalez, Frank Seidel, Irina Klassen, and Mário J. Franca

Solution for a Sluicing Channel with High and Coarse Sediment Intake in an Alpine River 1202
Jakob Siedersleben, Marco Schuster, Markus Aufleger, and Stefan Achleitner

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Efficacy of Sediment Flushing for varying Bed Slopes and Sediment Grain Sizes 1208
Sebastián Guillén-Ludeña, Jorge A. Toapaxi, and Luis G. Castillo

The Sedimentation In Marmolejo Reservoir. A Challenge For Sustainable Management 1213
David López Gómez, Miguel de Blas Moncalvillo, and Ángel Gassó Sánchez

3. Environmental hydraulics and urban water cycle

3.1. Ecohydraulics

Algal Removal by Bubble Plumes in Unstratified Lakes 1224
Iran E. Lima Neto and Carlos H. A. Pacheco

Coronavirus and its Persistence in Water for Human and Residual Consumption: A Background Check 1231
Edwin Pino V.

Evaluation of Fish Injuries at the Outlet of Downstream Passage Devices: Preliminary in Situ and Laboratory Experiments with Sensor Fish 1237
Yvan Bercovitz, Laurence Tissot, Pierre Sagnes, Dominique Courret, Franck Lebert, Thierry Lagarigue, Vincent Mataix, and Lionel Dumond

Fish Swimming Behavior and Bypass Acceptance at Curved-Bar Rack Bypass Systems 1246
Claudia Beck, Ismail Albayrak, Julian Meister, Armin Peter, Oliver M. Selz, Claudia Leuch, David F. Vetsch, and Robert M. Boes

Development of Low-Voltage Electrified Fish Guidance Racks for Safe Downstream Fish Migration 1256
Anita Moldenhauer-Roth, Oliver M. Selz, Felix Unterberger, Ismail Albayrak, and Robert M. Boes

MultiPAC – A Multiparameter Approach to Address Colmation in Rivers 1266
Markus Noack, Lydia Seitz, Stefan Haun, and Silke Wieprecht

Effect of Multiple Layered Vegetation on the Velocity Distribution of Flow in An Open Channel 1272
Xiaonan Tang, Suyang Zhang, Jiaze Cao, Hanyi Wang, Nanyu Xiao, and Yutong Guan

Assessment of the Physical Habitat Suitability (PHS) for Three Autochthonous Fish Species in the Duero River (Spain) with the Modelling Tool Iberhabitat 1281
María Díaz-Redondo, Francisco M. Cortés Sánchez, and Beatriz Molina Martín

Flow Dependent Dynamics of Microhabitat Patches for Fish Habitat Assessment 1286
Yuiko Chino, Gregory B. Pasternack, Takashi Gomi, and Shinji Fukuda

Transport and Capture of Neutrally Buoyant Particles in Streams: Investigating the Effect of Obstacle Configuration 1292
Hojung You and Rafael O. Tinoco

High-Resolution Bathymetric Lidar Data in 2D Hydrodynamic and Habitat Modeling –Effects of Mesh Resolution on Instream Habitat Modeling 1298
Stefan Jocham and Markus Aufleger

Drainage of Gravity Currents from an Edge and a Permeable Substrate in a Porous Medium or Fracture with Variable Properties 1305
Farhad Zeighami, Alessandro Lenci, and Vittorio Di Federico

Effect of Bypass Layout on Guidance of Downstream Moving Fish at Bar Rack Bypass Systems 1312
Robert M. Boes, Claudia Beck, Julian Meister, Armin Peter, Maximilian Kastinger, and Ismail Albayrak

Australian Native Fish Attracted by Jet Flows into Tube Fishways 1322

3.6. Desalination and water treatment

CFD Numerical Simulation of Submerged Dense Jets in Cross-flows 1981
Mostafa Taherian, Seyed Ahmad Reza Saeidi Hosseini, and Abdolmajid Mohammadian

Results of a Full-Scale Model of a Macrophyte Wastewater Treatment Plant 1989
Oscar Ruiz Lozano, Alejandro Acero Oliete, Pedro López Julián, and Beniamino Russo

Can High Hydrodynamic Stresses Contribute to E. coli Inactivation? Experimental Evidences from Laminar and Turbulent Flows 1994
Davide Vettori, Roberta Davello, Riccardo Vesipa, Costantino Manes, and Luca Ridolfi

National-scale Management and Protection of Desalination Plant Water Supplies 2001
Matthew John Wood and Graham Siggers

Monitoring and Control of Waste Water Discharges in Real Time 2006
Orejudo Prieto de los Mozos and Maria Emma

3.7. Advanced treatment processes for wastewaters

Effect of the Pharmaceuticals (Diclofenac, Ibuprofen And Erythromycin) on the Heterotrophic Biomass of a Membrane Bioreactor in Urban Wastewater Treatment 2015
Laura Antiñolo Bermúdez, Jaime Martín Pascual, María del Mar Muñio Martínez, and Jose Manuel Poyatos Capilla

Technical Assessment of Natural-Based and Advanced Technologies for the Removal of Micropollutants from Municipal Wastewater in a Real Scenario 2019
Irene Salmerón, Silvia Venditti, and Joachim Hansen

Solar Processes For Urban Wastewater Purification: A Comparative Disinfection And Decontamination Study At Pilot Plant Scale In A Compound Parabolic Collector (CPC) Reactor 2025
María Jesús Abeledo-Lameiro, Alba Hernández-Zanoletty, Samira Nahim-Granados, María Inmaculada Polo-López, Isabel Oller, and Sixto Malato

Assessment of New Immobilized Photocatalysts for Wastewater Disinfection and Decontamination 2031
Alba Hernández-Zanoletty, Isabel Oller, Inmaculada Polo-López, Sixto Malato, Ana Ruiz-Delgado, Samira Nahim-Granados, Jenny Flores, Oscar Cabezuelo, María Luisa Marín, and Francisco Boscá.

A Physical Model Study of the North Shore Wastewater Treatment Plant Pumping Station 2037
James Li and Maryam Shahab

Treatment of Wastewater Effluent Using Photo-Fenton Combined with Granular Activated Carbon Enhancing Microcontaminants Removal 2041
P. Núñez-Tafalla, I. Salmerón, S. Venditti, and J. Hansen

3.8. Water recycling and reuse

Urban Grey Water Recycling at a District-scale – A Case Study at Anderson Road Quarry Site Development, Hong Kong 2047
Mable Lai-Hang Lam, Siu-Kwong Wong, and Harry Lee

Multi-objective Planning for Co-managing Power Plant Blowdown Water and Shale Gas Produced Water for Resource Recovery 2055
Payton Seats, Mohammad Hafez Ahmed, Golnoosh Khajouei, Hunter Barber, Harry Finklea, Fernando V. Lima, and Lian-Shin Lin

An Innovative Reclaimed Water Treatment for the Valorization of Nutrients and Salts 2060
Mateo Pastur Romay, Òscar Arumí Arderiu, Adriana Romero, Eva Mena, Benoît Lefevre, Jose Luis Cortina, Julio López, Celia Castro-Barros, and Joana Tobella

Stretegies fot the Monitorization and Control of Algae in Drinking Water Treatment Plants 3372
Laura Bonastre, Mateo Pastur, Sergio Montes, Marta Ganzer, Belén Galofré, Carles Vilaró, Susana González, and Pau Cardoner

Resilience Changes in a River Basin: Identifying Hydrologic Regime Shifts Using Long-term Streamflow Data 3377
Laura Elisa Garza-Díaz and Samuel Sandoval-Solís

A Hydro-Economic Model for Climate Change Impact Assessment in Guadalquivir River Basin 3382
Javier Martínez-Dalmau, Enrique Tocados, Carlos Gutiérrez-Martín, Taher Kahil and Julio Berbel

5.4. Water and circular economy: valuing water

The Value of Water: A Perspective from Sub-Saharan Africa 3390
Henning Bjornlund and Vibeke Bjornlund

Assessment of UAV-based Photogrammetry for Bathymetry Measurements in Haiti: Comparison with Manual Surveys and Official Data 3399
Rotchild Louis, Géthro Dauphin, Adermus Joseph, Nyankona Gonomy, Yves Zech, and Sandra Soares-Frazão

Evaluation and Analysis of Water Conservation Value of Ecosystem in Qilian Mountain National Park, Qinghai Province, China 3409
Zhang Ying and Meng Na

Extended Water Footprint as a Criterion for Multiuse Water Allocation: Case of Peru 3418
Julio M. Kuroiwa and Luis F. Castro

Integration of the CityWat model into the Urban Planning Sustainability Framework: case study for the Enfield Borough of London 3425
Pepe Puchol-Salort, Darren Beriro, Stanislava Boskovic, Barnaby Dobson, Vladimir Krivtsov, Andrew Marchant, and Ana Mijic

©2022 IAHR. Used with permission / ISSN-L 2521-7119

5.5. Water-food-energy nexus: sustainability of water resources

Identifying the Groundwater Over-pumping Area for Land Subsidence Prevention in the Central Taiwan by Linear Signal Model 3434
Abdoul Rachid Ouédraogo, and Shaohua Marko Hsu

Holistic Modelling of the Global Water-Energy-Food Nexus: Analysing Potential Pathways for the Future 3442
Janez Sušnik

Assessing the Impacts of Proposed Lake Restoration Measures on the Water-Energy-Food Nexus in Urmia Lake, Iran, Using System Dynamics Modelling 3451
Elham Bakhshianlamouki, Sara Masia, Poolad Karimi, Pieter van der Zaag, and Janez Sušnik

Solar Processes to Treat and Reuse Agro-Industrial Wastewater: Close the Water-Food-Energy Nexus in Fresh-Cut Industries 3461
Samira Nahim-Granados, Patricia Plaza-Bolaños, Isabel Oller, Sixto Malato, Ana Agüera, J. A. Sánchez-Pérez, and María Inmaculada Polo-López

Hydropower Generation from Shallow Supercritical Flows in Irrigation Canals 3467
Magalí Rodriguez and Gerald Müller

Simulated Hydropower Production Under Climate Change Scenarios at Torrão Dam, in Northern Portugal 3477
Paulo Diogo, Babar Mujtaba, Pedro Beça, Sofia Simoes, Patrícia Fortes, and Filipa Amorim

WEFNAF: Water-Energy-Food Nexus Assessment Framework for Multicentric Water Resource Management 3482
Amin Elshorbagy and Lina Wu

Overview of Water Energy Food Nexus in a Volcanic Basin Case Study of Progo River Basin, Indonesia 3490
Vicky Ariyanti, Dwi Purwantoro, and Shakti Rahadiansyah

Assessing the Spatiotemporal Characteristics and Future Potential of Net Ecosystem Production in Qinghai Province 3498
Di Xie, Deyu Zhong, and Yinglin Tian

5.6. Water use efficiency

Study of an Urban District under certain Hydraulic Conditions Analysing Different Operating Scenarios 3507
Alexandros Mentes, Panagiota Stournara, Panagiota Galiatsatou and Dimitrios Spyrou

Smart-Water Project: Software Design for Processing and Managing Water Metering Data 3516
Alexandros Mentes, Dimitrios Spyrou, Panagiota Stournara, and Panagiota Galiatsatou

Hydraulic Characterization of Low Flow Drip Irrigation Emitters Used in Intensive Horticultural Crops in Almeria (Spain) 3526
Rafael Reyes Requena, Rafael Baeza Cano, José Roldán Cañas, Gema Cánovas Fernández, and María Fátima Moreno Pérez

A Smart Control Valve for Improved Irrigation Management 3534
Giacomo Ferrarese, Umberto Fratino, Stefano Malavasi, and Alessandro Pagano

Assessing the Trade-off Between Multiple Water Needs and the Environmental Flow: The Case of Santa Teresa Reservoir at River Tormes (Duero Basin, Spain) 3543
Francesca Di Concilio, Luis Garrote, and Giacomo Viccione

Assessment of Bahr el Ghazal Swamps Characteristics in South Sudan Using Remote Sensing Technique 3554
Amgad Mansour, Nesma Adwy, and Hossam M. Moghazy

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Assimilation of SMAP Soil Moisture Data into a Fully Distributed Hydrological Model Using a Tempered Particle Filter (TPF): The Landro Basin in Spain as a Test Case 3564
Gonzalo García-Alén, Renaud Hostache, Patrick Matgen, Luis Cea, and Jerónimo Puertas

Application of Clustering Approach for Risk Assessment of Drinking Water Facilities Worldwide 3574
Prisha Puri, Sudarshan Kurwadkar, and Doina Bein

5.7. Cooperation, governance of water and transboundary catchments

Plan for the Improvement of the Water Resources Monitoring Network in the Chillón, Rímac, Lurín and Alto Mantaro basins, Perú 3580
Chávarri-Velarde, Eduardo, Tueros Giler, and César

Using the HECCA Model to Allocate Water Demands Considering Environmental Flow Constraints 3590
Nicolás Cortés-Torres, Camila Fernández Berbeo, Karen Ortega Tenjo, Martin Pérez Pedraza, Laura Laverde Mesa, Carlos Cubillos Peña, and Sergio Salazar-Galán

Water Has no Regard for Political Borders. Managing Agriculture-Energy-Water-People Nexus is the Way Forward in the Nile Basin 3596
Amin Elshorbagy and Ahmed Abdelkader

6. Computational and experimental methods

6.1. Computational methods in fluid dynamics and hydro-environmental problems

Primal Formulation for Turbulent Stresses in Implicit Discontinuous Galerkin Shallow Water Equations 3606
Haegyun Lee and Namjoo Lee

Unsteady Transcritical Flow Modelling Using Vertically-Averaged and Moment Equations 3615
Francisco N. Cantero-Chinchilla, Rafael J. Bergillos, Óscar Castro-Orgaz, Luís Cea, and Willi H. Hager

Estimation of Uncontrollable and Unclassifiable Pollutant Sinks and Sources Along a River Stretch Employing Software Tools 3623
Elisabeta Cristina Timis

Large Eddy Simulation of Free Surface Flow Over Square Bars in Laminar, Transitional and Turbulent Flows 3632
Razieh Jalalabadi and Thorsten Stoesser

Improving the Identifiability of Hydrological Model Parameters Through Remotely Sensed Data and Sequential Calibration 3642
Jesús Casado-Rodríguez, Manuel del Jesus, and Salvador Navas

Modelling Turbulent Coherent Structures in Lateral River Cavities using Large-Eddy Simulation and a High-Order 2D Shallow Water Model 3647
Pablo Ouro, Adrián Navas-Montilla, Mário J. Franca, and Carmelo Juez

“Cassiopée” Software: a Tool to Assist in the Hydraulic Dimensioning of Upstream and Downstream Fish Passage Devices 3654
David Dorchies, Mathias Chouet, François Grand, Ludovic Cassan, Sylvain Richard, and Dominique Courret

Numerical Benchmark for Modelling Wave Impacts Against Vertical Walls Using Openfoam 3663
Sergio Croquer, Pilar Díaz-Carrasco, Sébastien Poncet, Jay Lacey, and Ioan Nistor

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Reduced-Order Modeling of Aquifer Dynamics and Well Hydraulics in a Confined Aquifer Subjected to Extraction through Partially Penetrating Pumping Wells 3672
Saumava Dey and Anirban Dhar

GPU-based Simulation of Long-term Hydrological Events in Mountain Catchments: Application to Spanish Central Pyrenees 3681
Javier Fernández-Pato, Estela Nadal-Romero, Noemí Lana-Renault, and Pilar García-Navarro

A Hyperbolic Boussinesq Groundwater Flow Model 3688
Ilhan Özgen-Xian and Adrián Navas-Montilla

Analysis of Standing Waves in a Channel Lateral Cavity: Assessing the Performance of High-Resolution Numerical Models 3694
Adrián Navas-Montilla, Sergio Martínez-Aranda, Antonio Lozano, Ignacio García-Palacín, and Pilar García-Navarro

Numerical Modeling of Air Bubble Transport Behind a Model Scale Weir 3702
Carsten Thorenz and Annika Grefenstein

Definition of a Numerical Prior Indicator to Identify the Relevance of Diffusion and Dispersion Processes in Water Distribution Networks 3711
Stefania Piazza, Mariacrocetta Sambito, and Gabriele Freni

Bayesian Identification of Brackish Water Infiltration by Lagrangian Sensors 3718
Mariacrocetta Sambito, Stefania Piazza, and Gabriele Freni

Analysis and Optimization of Hydraulic Characteristics at Fish Guidance Structures Using CFD 3721
Claudia Leuch, Claudia Beck, Ismail Albayrak, David F. Vetsch, and Robert M. Boes

Modeling Pressurized Flow through Hydraulic Structures and Bridges Using a 2D-SWE-based Model 3729
Marcos Sanz-Ramos, Alejandro López-Núñez, Luis Cea, and Ernest Bladé

Simulation of a Transient Gravity Current – Comparison of Four RANS Eddy-Viscosity Turbulence Models 3737
Arnau Bayon, Mohamed Radwan, Daniel Valero, and Mário J. Franca

A Two-Layer Model for the Numerical Simulation of Oil Spills over Coastal Flows 3748
Isabel Echeverribar, Pilar Brufau, and Pilar García-Navarro

Hydrodynamics and Populational Density Model of Limnoperna fortunei in the Pereira Barreto Artificial Channel, Brazil 3756
Raquel Figueira, Ramoni Zancanela Sedano Azevedo, Isaac Pinheiro dos Santos, José Carlos Rubianes Silva, Anna Regina Corbo Costa, Dayse Haime Pastore, Claudia Mazza Dias, Charles Henrique Xavier Barreto Barbosa, and Humberto Fortunato

Numerical Study of Dam Spilling Water – Saut de l'Ange- 3764
Javier Anez, Hakim Hamdani, Julien Reveillon, Yvan Bercovitz, Mathieu Guingo, Benjamin Duret, and François-Xavier Demoulin

Modelling the Fish Migration via the Euler-Lagrange Coupled Approach within Openfoam 3774
Qi Zhang, Jiayue Shi, Weiyang Zhao, Juping Huang, and Shanlin Xu

Study on Hydraulic Characteristics Simulation and Optimal Layout of Open Wide Single Chute Spillway 3780
Wenjiao Zhang, Lei Liu, Zhongmei Wang, Xing Zhao, and Nengming Hu

Air Cavities Propagation and Geysering in Sewer Systems: Theoretical and Finite Element Based Approaches 3789
Jorge Molina, and Pablo Ortiz

Numerical Model's Resolution Impact for Heat Exchange Interaction Over Agulhas Current 3799
Busatto Jacopo, Claudia Adduce, Bellucci Alessio, and Yang Chunxue

A Coupled CFD and DEM Study to Evaluate a Trash-boom Debris Retentency 3969
Felipe Araujo da Mata, João Lucas Dozzi Dantas, Patrick Donega Queiroz, Felipe Santos de Castro, Gabriel Galvão Matos, and André Mitsuo Kogishi

Development of Numerical Tool for Loads and Displacement Prediction in a River Debris Removal Solution 3979
Patrick Donegá Queiroz, João Lucas Dozzi Dantas, Felipe Santos de Castro, Felipe Araujo da Mata, Gabriel Galvão Matos, and André Mitsuo Kogishi

Influence of a Rigid Cylinder on Flow Structure over a Backward-Facing Step 3989
Milad Abdollahpour, Paola Gualtieri, and Carlo Gualtieri

Simulation of Groundwater Flow and Contaminant Transport in a Heterogeneous Confined Aquifer Using Meshless Weak Strong Form Method 3999
Sanjukta Das and Eldho T. I.

First results of the evaluation of a pilot project of SuDS installed in the UPNA of Tudela (Navarra-Spain) 4006
Fernando Baldero Echarren, José Javier López Rodríguez, Itsaso Ilzarbe Senosiain, and Jairo Gómez Muñoz

An Evaluation of Thirty Higher-order Upwinding Schemes for Modeling Pure Advection 4016
Naila Matin, Hasan Zobeyer, and Abul BM Baki

Future potential Groundwater drought forecast using Machine Learning 4024
Amos Agossou, Jae-Boem Lee, and Jeong-Seok Yang

Simulation of Upstream Migration of Fish Through Fishways Using Iric-Universal Tracer Tracker 4030
Tomohiko Fujita, Yasuyuki Shimizu, and Yasumitsu Kato

Development of a Multilayer Cascaded Co Based Lattice Boltzmann Model for Shallow Water Flows 4034
Jessica Padrone, Silvia Di Francesco, and Sara Venturi

Vertical Diffusion of Microplastics in Turbulent Flow 4041
Arefeh Shamskhany and Shooka Karimpour

Smoothed Particle Hydrodynamics Simulation of Flow and Contaminant Transport over Terrain and Stream 4051
Xin Yan Lye and Akihiko Nakayama

Hyperbolic Numerical Models for Unsteady Incompressible, Surcharged Stormwater Flows 4061
Ben R. Hodges, Jose G. Vasconcelos, Sazzad Sharior, and Vitor G. Geller

Numerical Simulations of Free Jump and Submerged Jump using k-ω SST Model 4067
Seongwook Choi and Sung-Uk Choi

Approaches for Modelling Historically Observed Seasonal Flooding in a Low Slope River 4073
Getachew Ewonetu Mamo, Davide Motta, and Martin Crapper

Numerical Models for Non-Darcy Flow based on Forchheimer's Law and Izbash's Law 4081
Tomoki Izumi and Naoyuki Yamashita

A High Accurate and Efficient 3D River Flow Model with A New Mode-Splitting Technique 4087
Jin Kashiwada and Yasuo Nihei

Settling and Rising Hydrodynamics of Microplastic Contaminants: A Numerical Investigation 4091
Zihe Zhao and Shooka Karimpour

Eddies and Waves in a Rotating Flow: an Experimental Study 4099
Stefania Espa and Simon Cabanes

Hydraulic Jump Simulation Via Smoothed Particle Hydrodynamics: A Critical Review 4105
Efstathios Chatzoglou and Antonios Liakopoulos

Tracking Coastal Change by Assimilating from Data Sources with Different Spatial and Temporal Scales 4115
Jonathan Higham, Andy Plater, Ben. Phillips, Nicoletta Leonardi, Dani Arribas-Bel, and Cai Bird

Assessing Structural and Parametric Uncertainty in Plume-Lake Models to Resolve Causal Drivers. Is the Circulation Induced by Bubble-Plume Oxygenation Devices in a Two-Basin Lake Sufficiently Strong to Control Interbasin Exchange? 4121
Jorge C. Toledo, Cintia L. Ramón, John C. Little, and Francisco J. Rueda

Lattice Boltzmann Methods for a Dense Vertical Jet in a Channel 4127
Maria Grazia Giordano, Andrea Montessori, Piergiorgio Fusco, Sabina Tangaro, and Daniela Malcangio

Numerical Experiments of Uni- And Bi-Directional Exchange Flows in A Rotating Trapezoidal Sill-Channel 4134
Manel Grifoll, Alan Cuthbertson, Jarle Berntsen, Maria Chiara De Falco, and Claudia Adduce

Non-hydrostatic Galerkin Model with Quadratic Pressure for Wave Propagation 4140
Lucas Calvo, Diana De Padova, and Michele Mossa

Numerical Investigation of Landslide-Tsunamis Generated by Different Mass Movement Types 4148
Jizhixian Liu, Valentin Heller, and Yang Wang

3D Computations of Driftwood Movement Around an Inlet Type Driftwood Capture Facility 4158
Ichiro Kimura, Kakeru Murata, and Takaaki Okamoto

Effect of a Bottom Moving Wall on the Hydrodynamics Around an Elliptical Cylinder Placed at 45o Angle of Incidence 4164
Subhrangshu Purkayastha, Debasish Dutta, and Mohammad Saud Afzal

Energy flexibility scenarios for North Macedonia 4174
Emil Zaev, Darko Babunski, Marija Lazarevikj, and Radmila Koleva

Hydrological Flood Forecast for the River Salzach Using Open Source and Open Data 4184
Gerald Krebs, Sebastian Gegenleithner, and Josef Schneider

Hydraulic Modelling of a Regulated River Reach on Different Scales to Evaluate its Inherent Environmental Conditions 4189
Anders G. Andersson and Henrik Lycksam

Hydrodynamic Optimization of a Large Pumping Station with Complex Geometry 4196
Sabarots Gerbec Martín and Guizzardi Saniago

Experiments on Buoyancy Transfer in a two-Layer System in Transient State 4207
Luca Chiapponi, Diana Petrolo, and Sandro Longo

Two-dimensional Numerical Modeling of the Uprooting of Macrophytes with focus on Induced Vegetation Drag Force (Rhône River, France) 4215
Florian Cordier, Geraldine Nogaro, Nicolas Claude, Bastien Jouy, and Sara Puijalon

6.2. Computational methods in sediment dynamics

Comparative Study of the Rheological Behavior of Sheared Bi- and Polydisperse Sediment Beds via Fully Resolved Simulations 4223
Christoph Rettinger, Sebastian Eibl, Ulrich Rüde, Sudarshan Konidena, and Bernhard Vowinckel

Multiphysics Modelling of Sediment Transport in Shallow Water 4232
Ekkehard Holzbecher

GPU-Accelerated Developments for the Realistic Simulationof Large-Scale Mud/Debris Flows 4240
Sergio Martínez-Aranda, Reinaldo García, and Pilar García-Navarro

Parametrization of Turbulence over Antidunes 4250
Nils Reidar Bøe Olsen, Jochen Aberle, and Francisco Núñez-González

Variability of Shape and Extent of a Sediment Plume in a two-way Coupled LES Model Using an Euler-Lagrange Approach 4258
Daniel Wildt, Christoph Hauer, Helmut Habersack, and Michael Tritthart

A Novel Method for the Continuous Measurement of Scoured Bridge Foundationsin Laboratory 4264
Ana Margarida Bento, Lúcia Couto, Teresa Viseu, and João Pedro Pêgo

3D-CFD Simulations of the Bulle Effect on Channel Bifurcations 4269
Tino Kostić, Yuanjie Ren, and Stephan Theobald

A Two-Phase/Two-Layer Model for Fast and Heavily Loaded Transient Flows 4278
Robin Meurice and Sandra Soares-Frazão

Application of Pick-Up and Drop Functions in Morphodynamic Modeling of Hooghly Estuary 4285
Saichenthur N., Murali K., and Sundar V.

Application of Depth-Averaged Bedload Finite-Volume Models to a Progressive Embankment Dam-Failure 4292
Masoumeh Ebrahimi, Robin Meurice, and Sandra Soares-Frazão

Depth-resolved Modelling of Suspended Sediment in the Surf and Swash Zones 4302
Joost W. M. Kranenborg, Geert H. P. Campmans, Jebbe J. van der Werf, Robert T. McCall, Niels Gjøl Jacobsen, Ad J. H. M. Reniers, and Suzanne J. M. H. Hulscher

The Influence of Periodic Stratification on Estuarine Sand Dunes 4308
W. M. van der Sande, P. C. Roos, T. Gerkema, and S. J. M. H. Hulscher

Effect of Eddy Viscosity and Turbulent Schmidt Number on Suspended Sediment Concentration Profiles: Interest of the Fractional Advection-Diffusion Equation 4313
Meron Welderufael, Rafik Absi, and Ali Faraj

Computational Modeling of Bed form Migration in Large Sand and Gravel Bed Rivers 4321
Sándor Baranya

Simulation of Particle-laden Turbulent Flow in Openfoam 4328
Atul Jaiswal, Minh Duc Bui, and Peter Rutschmann

Modelling River Dunes Under High and Low Flows 4336
L. R. Lokin, J. J. Warmink, A. Bomers, and S. J. M. H. Hulscher

Simulation of the flow chart of the sky jump and the dissipation pond of the Poechos Reservoir using the Ansys CFX program 4344
Reyes Salazar, J. and Mendoza Brayand

6.3. Computational methods in fluid-structure interactions

Numerical Modelling of Wave-Induced Scour Around Coastal Structures 4351
Pilar Díaz-Carrasco, Sergio Croquer, Vahid Tamimi, Sébastien Poncet, Jay Lacey, and Ioan Nistor

Performance Evaluation of Rheological Models and Yield Criteria in Simulating Rapid Flow-Induced Sediment Erosion Using SPH 4360
Yunfei Mao and Mingfu Guan

Computational Modeling of Coastal Flooding in Torquay due to Wave-Overtopping 4368
Santiago Martelo, Aristos Christou,,Shunqi Pan, Thorsten Stoesser, and Zhihua Xie

Numerical Simulation of Turbulent Free Surface Flows over Rough Beds 4378
Zhihua Xie, Santiago Martelo, Thorsten Stoesser, Junqiang Xia, and Pengzhi Lin

Numerical Investigation of Floating Breakwaters Using Time Domain Boundary Element Method 4383
Cebada-Relea, A. J., López, M., Claus, R., and Soto, F.

©2022 IAHR. Used with permission / ISSN-L 2521-7119

The Effect of Geometrical Transitions on the Wave Overtopping Load 4394
Vera M. van Bergeijk, Jord J. Warmink, and Suzanne J. M. H. Hulscher

Numerical Modelling of Floating Debris Impact on Structures During Extreme Hydrodynamic Events 4403
Gioele Ruffini, Riccardo Briganti, Corrado Altomare, Paolo De Girolamo, Jacob Stolle, Bahman Ghiassi, and Myrta Castellino

Numerical Modelling of Overtopping Flow Velocity and Layer Thickness at the Waterside Edge of the Dike Crest 4413
Weiqiu Chen, Jord J. Warmink, Marcel R. A. van Gent, and Suzanne J. M. H. Hulscher

Assessment of the Maximum Flooding Level with the presence of infrastructures: the case of Puerto de Vega (Northern Spain) 4422
Miguel Á. Reyes-Merlo, Christian J. Montero-Llerandi, Fernando de La Torre-Fernández, and José R. Martínez-Cordero

This is a How to Characterize Behavior of Water Cycle Infrastructures Using 3D CFD Models – WWTP Bioreactors 4431
Mónica Ortega, Antonio Lastra, and Celia Ortega

Numerical Investigation of Waves Interacting with Rigid and Flexible Plates 4438
Tommaso Attili, Valentin Heller, and Savvas Triantafyllou

Development of Numerical Model in Boundary Fitted Coordinate System and Application to the Lateral Overtopping Flows 4448
Qiyun Pang and Shinichiro Onda

Physical and Numerical Modeling Study of a Submerged Detached Breakwater at Praia da Vagueira, Portugal: Surfing Conditions 4454
Ana Mendonça, Conceição Juana Fortes, Maria Graça Neves, Carolina Martinez, Rui Reis, César Costa, Joana Simão, Pedro Bicudo, Francisco Sancho, and Filipa S. B. F. Oliveira

Analysis of the Influence of Francis Turbine Guide Vane Axis Location on Its Structural Parameters 4463
Marija Lazarevikj and Zoran Markov

Numerical Evaluation of The Action on A Pile-Moored Fish Cage Forced by A Storm Sea State in Different Configurations 4470
Zitti Gianluca, Novelli Nico, and Brocchini Maurizio

Sph Modelling of the Interaction Between a Solitary Wave and Moving Tetrapods of a Breakwater 4478
Jun Mitsui, Corrado Altomare, Alejandro J. C. Crespo, José Domínguez, Shin-ichi Kubota, Moncho Gómez-Gesteira, and Tomohiro Suzuki

Internal Boundary Conditions for Flood Simulation with 2D Shallow Water Equations Using Finite Volume Models: Bridge Piers 4488
Giada Varra, Veronica Pepe, Renata Della Morte, and Luca Cozzolino

Numerical Simulation of the Configuration of Small Hydropower using a Novel Smoothed Particle Hydrodynamics Method 4494
Shu Kai Ng and Akihiko Nakayama

Numerical Simulation of Overtopping Events in Vertical Breakwater with The DualSPHysics Model 4502
Ignacio Fernández de Bobadilla, M. Jesús Martín, Paloma Aberturas, Corrado Altomare, Alejandro J. C. Crespo, José M. Dominguez, and Moncho Gómez-Gesteira

LES of Lock-Exchange Density Currents Interacting with a Vertical Emergent Cylinder 4512
Ana M. Ricardo, Rui M. L. Ferreira, Giovanni di Lollo, Rodrigo Farias, Luís Gil, and Moisés Brito

Three-Dimensional Numerical Study of Hydrodynamics Around a Pair of Circular Cylinders Due to the Combined Wave-current Effect Using the Level Set Method 4522
Debasish Dutta, Lalit Kumar, and Mohammad Saud Afzal

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Large Eddy Simulation of Two Phase Over Different Cylinder Configurations 4532
Santiago Martelo

6.4. Computational and experimental methods: towards composite modelling

Interaction of Short Wind Waves and Swell: An Experimental and Numerical Study 4542
Antoine Villefer, Michel Benoit, Damien Violeau, Maria João Teles, Christopher Luneau, and Hubert Branger

Analytical and Numerical Study of Novel Scaling Laws for Air-Water Flows 4551
Daniele Catucci, Riccardo Briganti, and Valentin Heller

A Laboratory and Numerical Study of Wave Attenuation Through Rigid Vegetation 4561
Phan, L. K., Truong, S. H., and Stive, M. J. F.

Numerical-Experimental Comparison of the Wavefront Caused by the Rapid Opening of a Gate 4566
Roberto Abraham Vázquez Martínez, José Luis Aragón Hernández, Martí Sánchez Juny, and y Eliseo Carrizosa Elizondo

Hybrid Numerical-Physical Hydraulic Modelling Prevents a Fish Pass From Clogging – Arve River Geneva-CH 4573
Vecsernyes Zsolt, Jaeger Amandine, Ulysse Beytrison, Toufik Bekaddour, and Andreini Nicolas

Streamflow Prediction in Ungauged Basins (PUB) Using an Ensemble Modelling Approach 4581
Juan F. Farfán and Luis Cea

Numerical Investigation of the Electric-Structural Interaction (ESI) in a Full-scale 10 MW Kaplan Turbine 4590
Carlos Miguel-Espinar, Rafel Roig, Oriol Gomis-Bellmunt, and Xavier Escaler

Composite Modeling of the Effect of Material Composition on Spatial Dam Breaching Due to Overtopping 4600
Matthew C. Halso, Frederic M. Evers, David F. Vetsch, and Robert M. Boes

Coherent Structures Downstream Rigid Emergent Cylinders in Presence of Long Waves 4609
Francesca De Serio and Rosangela Basile

Application of Multilinear Regression and Algebra Map to estimate the Spatial Variability of Rainfall 4616
Verónica Ruiz-Ortiz, Jorge M. G. P. Isidoro, Helena Maria Fernandez, Fernando M. Granja-Martins, and Santiago García-López

Lock-Exchange Density Currents Interacting with an Array Of Vertical Emergent Cylinders 4622
Ana M. Ricardo, João Ramos, Gianluca Giampa, Moisés Brito, and Rui M. L. Ferreira

Hybrid Modeling of the Spillway of the Pálmaces Dam (Guadalajara, España) 4628
Francisco Ramón Andrés Martín and David López Gómez

6.5. Optimization methods and uncertainty assessment

Automatic Calibration of a Continental Shelf Model of the North Sea Using Data Assimilation Algorithm 4637
Kai Chu, W. Alexander Breugem, Li Wang, and Boudewijn Decrop

Automatic Calibration of a Shallow Water Model for Rainfall-Runoff Simulations Using Fast Global Optimization 4647
Aziz Hassan, Franziska Tügel, Ilhan Özgen-Xian, Frank Molkenthin, and Reinhard Hinkelmann

Improving Energy-efficiency of Pumping Operations in Waterways: A combined Laboratory and Computational Approach 4656
J. Hardy, P. Dewallef, S. Erpicum, P. Archambeau, M. Pirotton, D. Parkinson, N. Taylor, C. Barnett, and B. Dewals

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Physical Complexity to Model Rainfall-Driven Urban Surface Water Flooding 4667
Kaihua Guo and Mingfu Guan

Fuzzy Map Comparisons for The Evaluation of Hydro-Morphodynamic Models 4672
Beatriz Negreiros, Sebastian Schwindt, Stefan Haun, and Silke Wieprecht

A 1D Shallow Water Reduced-Order Model Based on POD 4680
Pablo Solán-Fustero, Adrián Navas-Montilla, José Luis Gracia Lozano, and Pilar García-Navarro

Assessing the Sensitivity of Tidal Range Energy Models to Water Level Accuracy 4688
Nicolas Hanousek and Reza Ahmadian

Uncertainty Analysis of a Lumped Physically Based Numerical Model of Dam Breaching 4698
Vincent Schmitz, Maarten Arnst, Kamal El Kadi Abderrezzak, Michel Pirotton, Sébastien Erpicum, Pierre Archambeau, and Benjamin Dewals

Software Solution for Determining the Optimum Volume of the Water Tank Based on the Distribution of Maximum Daily Consumption 4704
Domagoj Nakic, Bojan Djurin, Bozo Soldo, and Drazen Vouk

Water Balance Estimation of the Kifissos Experimental Sub-Basin Using Swat Hydrological Model 4714
Evgenia Koltsida and Andreas Kallioras

Tidal Array Spatial Optimisation Combining Shallow Water Equations and Wake Superposition Modelling 4720
Connor Jordan, Davor Dundovic, Anastasia Fragkou, Georgios Deskos, Daniel Coles, Matthew D. Piggott, and Athanasios Angeloudis

High-Order Numerical Sensitivity Tests of Wind-Driven Boundary Layer Currents to Finite Depth, Inhomogeneous Eddy Viscosity, and Baroclinic Pressure Gradient 4730
Víctor J. Llorente, Enrique M. Padilla, and Manuel Díez-Minguito

A Three-Step Approach for Bias Adjustment of Satellite-Based Daily Precipitation Data 4736
Mahdi Alemi and Rodrigo Maia

Dynamic Bayesian Network Method for Structural Safety Evaluation of Diversion Tunnel 4746
Kang Liu, Zhaowei Liu, Yongcan Chen, and Haoran Wang

Uncertainty and Sensitivity Analyses with Dependent Inputs in a 2D Hydraulic Model of the Loire River 4756
Lucie Pheulpin, Antonin Migaud, and Nathalie Bertrand

Significance of Uncertainty Quantification for a Radionuclide Transport model of a Uranium Tailings pond in Karnataka, India 4764
Bhavya Ravinder and Elango Lakshmanan

A Method to Quantify the Uncertainty in Copula Parameters when Studying Dependence Structures of Time Series 4769
Ronald van Nooijen, Changrang Zhou, and Alla Kolechkina

Estimating the Optimal Velocity Measurement Time in Rivers' Flow Measurements: An Uncertainty Approach 4775
Robert Clasing and Enrique Muñoz

Dimension Reduction in Hydrological Models – Case Study for a Lumped Parameter Model for Karst Spring Discharge in Combination with Active Subspaces 4784
Max Gustav Rudolph, Alireza Kavousi, Thomas Wöhling, Raoul Collenteur, Pierre-Yves Jeannin, and Thomas Reimann

Combining Satellite Data on Evapotranspiration for Improved Spatial Pattern of Hydrological Model: Impact on Appropriate Pedo-Transfer Function Selection 4794
Hadis Mohajerani, Markus Casper, Christopher Hutengs, Mathias Jackel, Jesús Rodrigo-Comino, and Michael Vohland

6.6. Artificial intelligence in hydro-environment engineering

Insights Into Fish-Anthropogenic Pressures Relationships Using Machine Learning Techniques: The Case Of Castilla-La Mancha (Spain) 4803
Carlotta Valerio, Graciela Gómez Nicola, Rocío Aránzazu Baquero Noriega, Alberto Garrido, and Lucia De Stefano

Pattern Analysis of Meteorological Field causing Heavy Rainfall Disaster in Kyushu and Chugoku Region Japan Using Self Organizing Map 4812
Koji Asai, Koji Nishiyama, and Hajime Shirozu

Physics-Informed Machine Learning for Pollutant Transport Modelling in Surface Water 4819
Daan Bertels and Patrick Willems

Coupling Support Vector Machine and physically-based Hydrological Modeling for Reducing the Computational Time in Climate Change Studies 4827
Florentin Hofmeister, Alice Spadina, and Gabriele Chiogna

Application of Machine Learning techniques to optimize Water Disinfection through Advanced Oxidation Processes 4837
Sonia Guerra-Rodríguez, David J. Vicente, Jorge Rodríguez-Chueca, Alejandro Pérez-Aja, Encarnación Rodríguez, and Fernando Salazar

A Reliable Monitoring Approach of Floods in Small and High Slope Watersheds 4841
Gonçalo Jesus, Anabela Oliveira, João Rogeiro, Rui Rodrigues, and João Fernandes

Assessment of Random Forest Technique to Predict Sediment First Flush in Urban Watersheds 4848
Cosimo Russo, Alberto Castro, and Angela Gorgoglione

Obtaining Riparian Vegetation Characteristics from UAV Optical Imagery 3D Point Cloud Data 4855
André Araújo Fortes, Masakazu Hashimoto, Keiko Udo, Ken Ichikawa, and Shosuke Sato

A Machine Learning-Based Surrogate Model for the Identification of Risk Zones due to Off-stream Reservoir Failure 4863
Nathalia Silva Cancino, Fernando Salazar, Marcos Sanz-Ramos, and Ernest Bladé i Castellet

Model Tree-based Approaches for Forecasting Hydroclimatic Variables at Different Temporal Scales 4873
Ramesh S. V. Teegavarapu, Alexis Schauer, and Priyank Sharma

Modelling Flash Floods in Ungauged Mountainous Catchments in Henan Province, China: A Machine Learning Approach for Parameter Regionalization 4880
Sijia Hao, Qiang Ma, Philippe Gourbesville, Guomin Lyu, Wenchuan Wang, and Changjun Liu

Assessment of Long-Term Heavy Metal Contamination in Aquatic Ecosystems Using a Combination of Secondary Data Analysis Techniques 4887
Basmah Bushra, Leyla Bazneh, Lipika Deka, Paul J. Wood, and Diganta B. Das

Regional Models Based on Multi-Gene Genetic Programming for the Simulation of Monthly Runoff Series 4893
Dario Pumo, Giuseppe Cipolla, and Leonardo V. Noto

Data-Driven Models for Flooding Forecasting in Small Watersheds 4901
Sergio Zubelzu, Sara E. Matendo, and Victor Galán

Exploring the Impact of Coastal Water Quality Parameters on Chlorophyll-a near Cyprus with the use of Artificial Neural Networks 4906
Hadjisolomou Ekaterini, Antoniadis Konstantinos, Thasitis Ioannis, Abu-Alhaija Rana, Herodotou Herodotos, and Michaelides Michalis

Assessment of the Short-Term Streamflow Forecasting Using Machine Learning Fed by Deutscher Wetterdienst ICON Climate Forecasting Model 4915
Andrea Menapace, Daniele Dalla Torre, Ariele Zanfei, Pranav Dhawan, Michele Larcher, and Maurizio Righetti

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Machine Learning Approaches for Practical Water Resources Management: a Real and Consistent Tool or an Appealing Distraction? 4922
Claudio Mineo, Stefania Passaretti, Eleonora Boscariol, and Anna Varriale

6.7. Big data, data mining and high-performance computing under hydroinformatics

Canny Edge Detector: A Versatile Image Processing Method Applied in Hydraulic Engineering 4931
Markus Bähner, Yannic Fuchs, and Stefan Schäfer

An Hybrid Methodology for Integrated Flood Forecasting from the Watershed to the Sea 4941
Anabela Oliveira, Gonçalo de Jesus, João Rogeiro, João Fernandes, and Rui Rodrigues

Neural Network for Sub-grid scale Turbulence Modeling in Large-Eddy Simulations of the Jet 4947
Seongeun Choi, Jin Hwan Hwang, and Bo-Kyung Kim

AquaVar: High Performance Computing for Real Time Water Management 4952
Philippe Gourbesville, Hézouwé Amaou Tallé, and Masoud Ghulami

A Multi-Objective Naïve Bayes Binary Classifier for Anomaly Detection in Water Distribution Systems 4961
Gilberto Reynoso-Meza and Elizabeth Pauline Carreño-Alvarado

6.8. Instrumentation, experimental facilities and field experiments

Bank Breakage Around River Bends and Flood Flow Behavior in Non-Overflow Condition 4968
Takayuki Tanaka, Ryuki Harata, and Syun Tsutsui

Experimental Analysis of Overflow Free-Falling Jets 4975
Patricio R. Ortega, José M. Carrillo, Luis G. Castillo, and Juan T. García

Evaluation of a Peristaltic Pump for Sand Suspension Sampling 4985
Benoît Camenen, Loïc Deville-Cavellin, Fabien Thollet, Adrien Bonnefoy, Thierry Fretaud, and Gilles Pierrefeu

Large-scale Experiment of Compound Channels with and without Vegetation 4993
Truong, S. H., Un, Ji, and Uijttewaal, W. S. J.

An Automatic Water Information System in Northern Spain: the Case of the Cantabrian Water Agency 4999
J. M. Llavona Fernández, D. Ornia Laruelo, J. A. Luengo García, R. Vázquez Álvarez, D. Castañón Martínez, D. Ramos Sánchez, J. Casado Rodríguez, R. Espina Valdés, and J. J. Rodríguez García

Video-based Bedload Measurement in a Large River 5008
Alexander A. Ermilov, Gábor Fleit, Slaven Conevski, Massimo Guerrero, Nils Rüther and Sándor Baranya

Monitoring of Real Sites affected by Scour: Observation, Analysis and Feedback of Field Data 5014
Frédérique Larrarte, Christophe Chevalier, Hugues Chollet, Franziska Schmidt, Mohamed Belmokhtar, and Coraline Wintenberger

Flow Development in Rough-Bed Open Channels 5025
Andrea Zampiron, Stuart Cameron, Mark Stewart, and Vladimir Nikora

An Experimental Method to Quantitatively Analyse the Transport of Microplastic Particles in Fluvial Systems 5030
Jan-Pascal Boos, Franz Dichgans, Benjamin Gilfedder, and Sven Frei

Laser Triangulation-Based Ranging of Turbulent Water Surface with Epipolar Lines 5035
Urban Pavlovčič, Gaŝper Rak, Marko Hočevar, and Matija Jezerŝek

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Investigation of Auxiliary Energy Dissipator upon Energy Dissipation in a Submerged Hydraulic Jump within a Deep Tail Water Stilling Basin 5042
Zhao Zhou, Junxing Wang, Qigui Yang, and Minjun Li

Experimental Analysis of Floating Debris Barrier Employed on Polluted Rivers 5049
Felipe Santos de Castro, João Lucas Dozzi Dantas, André Mitsuo Kogishi, Patrick Donega Queiroz, Gabriel Galvão Matos, and Felipe Araujo da Mata

Automatic Velocity Measurement in River using Unmanned Surface Vehicle 5059
Michio Sanjou, Wataru Aizawa, and Takaaki Okamoto

Continuous Monitoring of Local Scoured Bed in the Vicinity of Piers by 3D Scanner Laser Technique 5064
Zaidan Jana, Poupardin Adrien, Bennabi Abdelkrim, Marin François, And Benamar Ahmed

PIV Investigation on Lock-Exchange Gravity Currents Propagating Over Roughness Elements 5073
MariaRita Maggi, Claudia Adduce, and Maria Eletta Negretti

Laboratory Investigations into Stability and Breaching of Rockfill Dams Using Dynamic Structure from Motion 5079
Geir Helge Kiplesund and Fjola Gudrun Sigtryggsdotti

Towards handheld Ultrasonic Velocity Profilers 5089
Marie Burckbuchler and Stéphane Fischer

Comparison of Signal Processing Algorithms for Multi-Sensor Intrusive Phase-Detection Probes 5094
Matthias Bürgler, Benjamin Hohermuth, David F. Vetsch, and Robert M. Boes

Experimental Research on Hydraulic Characteristics and Body Shape Optimization of Spillway with Twisted Flip Bucket 5104
Wang Renzhong, Zhang Wenjiao, Chen Junjie, Wu Caiping, and Zhao Xing

Development of a River Surface Velocimeter with Spatio-Temporal Volume using Autocorrelation and Fast Fourier Transforms 5113
Kwonkyu Yu and Namjoo Lee

Experimental Measurement of Free Surface and Sub-Surface Properties in a Partially Filled Pipe 5119
Jiayi Wu, Andrew Nichols, Anton Krynkin, and Martin Croft

Application of RGB-D Cameras in Hydraulic Laboratory Studies 5127
Brian M. Crookston and Daniel B. Bung

Novel Uav-Borne Green Lidar Versus Traditional Airborne Lidar: A Case Study to Characterize Hydraulic and Riparian Vegetation Attributes 5134
Md. Touhidul Islam, Keisuke Yoshida, Satoshi Nishiyama, and Koichi Sakai

Spatio-Temporal Characterization of Hydrodynamics and Mixing Processes in Obstructed Flows using Optical Techniques 5140
Jesus Leonardo Corredor-Garcia, Virginia Stovin, and Ian Guymer

Challenges of Surface Image Velocimetry – The Dam-Breach Example 5150
Rui Aleixo, Sílvia Amaral, Solange Mendes, Teresa Viseu, Teresa Alvarez, Carlos Alberto Dutra Fraga Filho, and Rui M. L. Ferreira

Monitoring Streamflow Pulses 5156
Marian Muste, Dongsu Kim, Kyungdong Kim, and Ehab Meselhe

A New Software Package and Filtering Algorithm Development for Despiking Doppler Velocimeter Data 5165
Farzad Asgari, Seyed Hossein Mohajeri, Mojtaba Mehraein, and Mohammad J. Ostad Mirza Tehrani

Towards an Impact Based Forecasting System of Flood Protection Dikes Using Hybrid Modelling Technologies in a Real-Scale Experimental Setup in the Hydraulic Engineering Laboratory of TU Dresden 5175
Dirk Fleischer, Ulf Helbig, and Jürgen Stamm

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Quantification of large wood (LW) impact forces at field-scale using SmartWood 5182
Gabriel Spreitzer, Isabella Schalko, Robert M. Boes, and Volker Weitbrecht

Experimental Identification of Mechanisms to Reduce Evaporation in the Dry Season at a Site in Mexico 5191
Maritza Liliana Arganis Juárez, María Fernanda Hernández Ignacio, and Sandra Lizbeth Rosales Silvestre

Bedform Measurements with LSPIV for Open Channel Flow 5198
Yen-Cheng Lin, Hao-Che Howard Ho, and Hsin-Yu Chen

Using Non-Intrusive Measuring Methods and Machine Learning in In-Channel Wood Analysis 5208
Mateja Škerjanec, Klemen Kregar, Franci Steinman, and Gaŝper Rak

Hydraulic Flume Investigation on Bedrock Roughness Using a 3D-InversePrinting System 5216
Caroline Selheim and Thorsten Hüsener

RFID Bedload Monitoring in Austria 5226
Shire-Peterlechner Dorian, Rindler Rolf, Markus Moser, and Habersack Helmut

Accuracy of Optical Flow Methods in Rotation-Dominated and Shear-Dominated Flows 5231
Rui M. L. Ferreira, Luis Mendes, Ana Margarida Ricardo, and Alexandre Bernardino

Classification of Erosion Characteristics of Grass Covers on Clay Under Wave Attack using a Medium-Scale Field Measurement Device: The Fire Hose Method 5239
Ligaya Wopereis, Paul van Steeg, and Myron van Damme

Isotopic Signature of Precipitation in Spain: Analysis of 20 Years' Records of Oxygen-18, Deuterium and Tritium from 20 Monitoring Stations 5248
María Emilia Jiménez-Hernández, María Fe Díaz-Teijeiro, Silvino Castaño-Castaño, and Javier Rodríguez-Arévalo

In Situ Nano-enhanced Nitrate Removal in Groundwater using Fe0 Nanoparticles: Site Characterization and First Preliminary Results 5257
Damián Sánchez García, Alberto Barrera García, Eva Mena Gil, Isabel María Hurtado Melgar, and Pablo Cascales de Paz

LDV Investigation of The Self Induced Pre-swirl and Flow Visualization at The Centrifugal Pump Inlet and Outlet 5264
Dorde S. Čantrak, Novica Z. Janković, Dejan B. Ilić, and Miloŝ S. Nedeljković

Comparison of Physical and Numerical Model of Spillway and Pressurized Sediment Channel of a Dam 5271
Volkan Oztug, Sevket Cokgor, Melih Kosucu, S. Utku Yilmaz, and Ismail Albayrak

On the Use of Simplified Models for TC-Induced Rainfall Inundation Assessments 5279
Ana Rueda, Andrea del Pozo, Laura Cagigal, Paula Camus, Alberto Luceño, and Fernando Méndez

6.9. Water from above: remote sensing and drones technologies

Evidence of Wind-Driven Currents from the Pictures Taken by a Webcam Framing The Surface of a Pre-Alpine Lake 5286
Giulia Valerio, Stella Volpini, and Marco Pilotti

An Infrared Quantitative Imaging Technique (IR-QIV) for Remote Sensing of River Flows 5292
Seth A. Schweitzer and Edwin A. Cowen

Infrared-Based Remote Sensing of Turbulence Metrics in Surface Waters: Going Beyond Mean Flow 5296
Edwin A. Cowen and Seth A. Schweitzer

Application of a New QPE Technique Using an Adaptive Parameters Finding Method for a Weather Radar in Córdoba, Argentina 5301
Matías Suárez, Denis Poffo, Ignacio Montamat, Raúl Comes, Jorge Saffe, Ricardo Ingaramo, Edgardo Pierobon, Lucía Sandalio, Andrés Lighezzolo, Giorgio Caranti, and Andrés Rodríguez

SOILPARAM 1.0: A Global-Scaled Enhanced Remote Sensing Application for Soil Characteristics Data Retrieval – Google Engine Environment, An Open-Source Treasure 5309
Mohammad Zeynoddin, Hossein Bonakdari, Silvio José Gumiere, Jean Caron, and Alain N Rousseau

Comparative of Rain Estimation between Rain Gauges, Space Born and Ground-Based Radar and for Extreme Rainfall Events in Oman 5320
Aisha Al Hashmi and Ahmed Hadidi

GALET: A Deep Learning Image Segmentation Model for Drone-Based Grain Size Analysis of Gravel Bars 5326
Christian Mörtl, Alexandre Baratier, Johan Berthet, Pierre-Allain Duvillard, and Giovanni De Cesare

River-Sea System Connectivity: Analysis of River Plume Dispersal in the Northern Adriatic Sea 5336
Rossella Belloni, Claudia Adduce, Federico Falcini, and Vittorio Ernesto Brando

Challenges of Using Remote Sensor Products in Colombian Regional Hydrological Models 5340
Maria Fernanda Riano, Nestor Mancipe-Munoz, and Diana Beltran-Huertas

Using Landsat 8 Images for Monitoring Surface Water Temperature in an Urban Tropical Reservoir 5351
Laura Wermuth, Luiz Felipe Machado Faria de Sousa, Lino Augusto Sander de Carvalho, Nilo de Oliveira Nascimento, and Talita Silva

Improve the Flooding Analysis Result from Low Resolution DEMs using Medium Resolution Satellite Hyperspectral Images 5359
Oscar A. Ruiz Lozano, Javier Sánchez Espeso, and Cesar Álvarez Díaz

Monitoring Wetlands Dynamics in the Inner Niger Delta using Open-Access Remotely Sensed Evapotranspiration Data 5367
Bich Tran, Marloes Mul, Solomon Seyoum, and Eddy Wymenga

Assessment of the Morphometric Characteristics and Filling Regime of Ponds and Reservoirs of Small Rivers of the Steppe Zone of Ukraine Using Data from Remote Sensing 5377
Oleh Hryb, Nataliia Loboda, Yaroslav Yarov, Tetiana Hrashchenkova, and Olha Hryb

Multi-technique approaches to Characterize and Monitor Coastal Landslides 5383
Galve J. P., Reyes-Carmona C., Barra A., Mateos R., Monserrat O., Azañón J. M., Pérez-García J. L., Ruano P., Notti D., Pérez-Peña V., Bejar M., and Millares A.

Hydro-statistical Assessment of GPM (IMERG V6) and TRMM (3B42 V7) Products Against a Sparse Rain Gauge Over a Mediterranean Mountainous Catchment (High Atlas, Morocco) 5388
Myriam Benkirane, Nour-Eddine Laftouhi, Agustín Millares, Marina Cantalejo, and Said Khabba

Benchmarking of Hierarchical Bayesian Model Aggregation, XGboost and Optimal Band Ratio Analysis (OBRA) Models for Total Suspended Sediments Retrieval from Remote Sensing 5395
Hui Ying Pak, Adrian Wing-Keung Law, and Weisi Lin

Optical Techniques for River Flow Monitoring: An Automatic Procedure for the Identification of the Best Video Sequence to Process by LS-PIV Technique 5404
Francesco Alongi, Dario Pumo, Carmelo Nasello, Salvatore Nizza, Giuseppe Ciraolo, and Leonardo Valerio Noto

Characterization of the Flow Regime of Temporary Rivers Using Sentinel-2 Satellite Data 5413
Carmela Cavallo, Maria Nicolina Papa, Massimilano Gargiulo, and Giuseppe Ruello

Google Earth Engine-Based Detection of Shoreline on Mixed Sand and Gravel Beaches 5418
Pedro Magaña, Pedro Otiñar, Marcus Silva, Manuel Cobos, and Asunción Baquerizo

Derive Accurate Water Thermal Maps from UAV-Mounted Thermal Camera for Ecological Application 5424
Matteo Redana, Fingal Summers, and Lesley T. Lancaster

Natural and Dammed Rivers: Which is Better for Salmon's Summer? 5433
Matteo Redana, Fingal Summers, and Lesley T. Lancaster

Uncertainty in Satellite Remote Sensing Derived Evapotranspiration Estimation: Current Status and Assessment Methods 5441
Bich Tran, Johannes Van Der Kwast, Marloes Mul, Solomon Seyoum, Remko Uijlenhoet, and Graham Jewitt

Estimating Riparian Vegetation Geometry and Biomass from LiDAR Point Clouds 5448
Melissa Latella, Tommaso Raimondo, and Carlo Camporeale

7. Coasts, estuaries, shelves and seas

7.1. Hydrodynamics, sediments, and ecosystem services

Location of Open Boundary and its Effects on Model Performance 5456
Edward Qiang Shen

A Novel Approach to Estimate the Coastal Protection Provided by Different Saltmarshes Species 5466
Maria Maza, Javier L. Lara, Iñigo J. Losada, and Fernando López-Arias

Study on the Ecological Water Demand of Seepweed (Suaeda salsa) Communities in the New Wetland of the Yellow River Delta 5470
Xing Ziqiang, Luo Xianxiang, Yan Denghua, Liu Shanshan, and Wang Ding

Analysis of Resuspension Phenomenon Using Coupled Wave, Current and Sediment Transport Model in the Ariake Sea 5479
Akira TAI, Simon Neill, Matthew Lewis, and Hideo Oshikawa

Characterization of Flow Reversals in the Uruguay River and its Relation to Forcings 5485
Rodrigo Junes, Sebastián Solari, and Mónica Fossati

Hydrodynamics and Morphodynamics of a Tidal Inlet on a Headland Dominated Coast 5495
Tran, T. T., Truong, S. H., and Le, H. T.

OpCIS – First Water Level Validation of the Operational Current Information System of the Port of Hamburg 5500
Suleman Shaikh, Thomas Strotmann, and Clemens Cremer

Comparison of Flow Properties In Developing and Developed Flow in Open Channels 5510
Subhadip Das, Ronald M. Barron, and Ram Balachandar

Hydrodynamic Modelling of an Intermittently Closed and Open Lagoon 5517
Maya Lambert and Sebastián Solari

Hydrodynamic Modeling in The Oued Sebou Area 5526
Nisrine Iouzzi, Laila Mouakkir, Mohamed Chagdali, and Dalila Loudyi

Adaptation of Harbor Agitation Models to Study Site Conditions: Case of the North Atlantic of Morocco 5537
Oumaima Gharnaté, Dalila Loudyi, and Chagdali Mohamed

Linearized theoretical Model for Impulsive Wave Overtopping at Vertical Walls 5547
Gerald Muller

Spatio-Temporal Analysis of Wave Energy Capacity in The Northern South China Sea Region Using the SWAN Model 5553
Tianan Deng, Huan-Feng Duan, Jinghua Wang, and Alireza Keramat

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Flow Structure and Sediment Suspension Affected by Rigid Submerged Vegetation under Waves, Currents and Combined Wave-Current Flows 5562
Sha Lou, Ming Chen, Shuguang Liu, and Guihui Zhong

Nearshore Sediment Transport in a Coastal Environment 5568
Honghai Li

Depth-Induced Breaking and Wave Set-up Representation by Coupling Spectral Wave and Coastal Hydrodynamics Models 5576
Anastasia K. Fragkou, Athanasios Angeloudis, Vengatesan Venugopal, and Christopher Old

New Implementation in SWAN for Quantifying Wave Attenuation by Vegetation 5584
Fernando Lopez-Arias, Maria Maza, Javier L. Lara, and Iñigo J. Losada

Ecosystem Services of Channelized Vs Natural Reaches of the River: The Odra River Case Study 5588
Zuzana Poledniková, Lukáš Vaverka, Adriana Holušová, and Tomáš Galia

New Large-Scale Laboratory Experiments into the Beach Slope Effect on Intra-Swash Sand Transport Processes 5593
S. Dionísio António, J. J. van der Werf, E. M. Horstman, I. Cáceres, J. M. Alsina, Jack Puleo, and S. J. M. H. Hulscher

Salt Intrusion in the Rhine Meuse Delta: Estuarine Circulation, Tidal Dispersion or Surge Effect? 5601
Wouter Kranenburg, Theo van der Kaaij, Meinard Tiessen, Yann Friocourt, and Meinte Blaas

Hydrodynamic Calibration of a Mixed Fluvial-tidal Delta Numerical Model: The Case of Changjiang Estuary 5609
Iacopo Carnacina, Nicoletta Leonardi, Xuefei Mei, and Zhijun Dai

Hybrid 2DH-3D Numerical Analysis of Chemical Substance Transported in Rivers During a Tsunami Attack: A Study of the Yodo River in Japan 5616
Hiroshi Nagashima, Ryosuke Takubo, Nozomu Yoneyama, Lisa Ito, and Akihiro Tokai

Field Measurements and Numerical Modeling of Wave Climate in the Pacific Coast of Costa Rica 5625
Henry Alfaro, Javier Zumbado, Felipe Calleja, and Georges Govaere

Sediment Scarcity: Modelling the Morphodynamics of Sandbanks When Sand Is Limited 5635
Thomas J. van Veelen, Pieter C. Roos, and Suzanne J. M. H. Hulscher

Suspended Particulate Matter (SPM) Observations In The Belgian Scheldt Estuary as Part of Omes Monitoring Program 5641
Jan Claus, Jelle Malschaert, Pieter Mallants, Sarah M. P. Berben, and Jonathan Kemp

Convective Regimes Induced by Surface Cooling and Topography in Stratified Waterbodies 5648
Hugo N. Ulloa, Cintia L. Ramón, Tomy Doda, and Damien Bouffard

Tidal Flow Modifications induce by Bridge Piles: The Example of Cádiz Bay 5656
Carmen Zarzuelo, Alejandro López-Ruiz, Arnoldo Valle-Levinson, Manuel Díez-Minguito, and Miguel Ortega-Sánchez

Incorporating Turbulence Metrics in the Assessment of Sediment Dynamics on Vegetated Coasts 5666
Jorge E. San Juan, and Rafael O. Tinoco

Changes in Ripple Migration Rates and Hydraulic Resistance with Increasing Mud-to-Sand Ratios 5671
Roberto Fernández, Hachem Kassem, Xuxu Wu, and Daniel R. Parsons

Numerical and physical modelling assessment of wave energy converters in the North Breakwater of the Port of Leixões 5677
Victor Ramos, Tomás Calheiros-Cabral, Gianmaria Giannini, Ajab Majidi, Luciana das Neves, Paulo Rosa-Santos, and Francisco Taveira-Pinto

Estimates of Turbulent Parameters in the Mid-latitude Valdivia River Estuary 5687
Andrés García-Ruiz, Manuel Carpio, Joaquín Cardenas, and Manuel Díez-Minguito

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Upriver Propagation of Tidal Waves and Mouth Bar Influence at a Microtidal Estuary: Observations and Modeling 5696
Matteo Postacchini, Giovanna Darvini, Eleonora Perugini, Jacopo Martinelli, Marco Ilari, and Maurizio Brocchini

7.2. Water quality and pollution

Numerical Source-Receptor Connectivity Study in Nearshore Coastal Waters 5703
Man Yue Lam and Reza Ahmadian

Potential Coastal Pollution from Agricultural Activities in Mexico 5713
Isaac Azuz-Adeath, Roberto Arreola, Fernanda Aguiar, and Mireya Cabrera

Numerical Modelling of Plastic Dispersion: A Case Study of The River Scheldt 5721
W. Alexander Breugem, Kai Chu, Theofano Koutrouveli, Li Wang, and Boudewijn Decrop

Survey Planning Framework for Remote Sensing of Water Quality using Portable Unmanned Aerial Vehicles (pUAVs) in Coastal Hydro-Environment 5731
Ha Linh Trinh, Hieu Trung Kieu, Hui Ying Pak, Dawn Sok Cheng Pang, and Adrian Wing-Keung Law

Optimization of Parameters in a Water Quality Index Model Using Principal Component Analysis 5739
Md. Galal Uddin, Stephen Nash, and Agnieszka I. Olbert

Water Quality Evaluation Using Various Water Quality Indices: A Case Study for B. Menderes River, Turkey 5745
Aslı Bor and Şebnem Elçi

Ecological Risk Assessment Linked to Potentially Toxic Elements (PTE) in a Mexican Complex Hydrological System (Tobari Coastal Lagoon, Sonora, México) 5755
González-Pérez, Beatriz, Esteller-Alberich Ma. Vicenta, Garrido-Hoyos Sofía, Díaz-Delgado, Carlos, Jara-Marini, Martín E., Renac, Christophe, and Barats, Aurélie

7.3. Coastal erosion

Modelling Storm-driven Erosion in Natural and Protected Steep Beaches 5764
Juan L. Garzon, Oscar Ferreira, and Theocharis A. Plomaritis

Three-dimensional Analysis of Propeller Local Scour Near a Quay Wal 5771
Giuseppe Curulli, Andrea Antonella Graziano, Nadia Penna, and Roberto Gaudio

Prediction and Monitoring of Waves and Shoreline Development in Mining Pit Lakes 5781
Felix Stiller, Torsten Heyer, and Jürgen Stamm

A New Model for Cross-Shore Surf and Swash Zone Morphology Evolution Induced by Nonlinear Waves 5788
Achilleas G. Samaras and Theophanis V. Karambas

Development of Nested Local Scale Wave Model for Storm Study in Brandon Bay Using SWAN 5792
Andi Egon, Stephen Nash, Eugene Farrell, Sheena Fennell, and Gregorio Iglesias

Integrated Coastal Management as an Imperative Goal in Spanish Mediterranean Coastal Projects. The Particular Case of the Extreme North of the Province of Valencia 5802
Ángela Palao Domínguez

Erosion of the Russian Arctic Coasts in Changing Environment 5807
Stanislav Ogorodov, Alisa Baranskaya, Natalya Shabanova, Nataliya Belova, Daria Bogatova, Anna Novikova, and Valeria Selyuzhenok

Shoreline Extraction using High Resolution Satellite Imagery at Start Bay, UK 5811
Emma McAllister, Andres Payo, Alessandro Novellino, Tony Dolphin, and Encarni Medina-Lopez

7.5. Estuaries and shore protection and restoration: green coastal infrastructure in climate change scenarios

Scope of Future River-Mouth Structures of the Alpine Rhine in Lake Constance 5936
David F. Vetsch and Claudia Leuch

Holobreak: Homogeneous Low-Crested Structures to Protect Beaches and Regenerate Coral Reefs 5943
Josep R. Medina, M. Esther Gómez-Martín, Jorge Molines, Patricia Mares-Nasarre, Mireille Escudero, Itxaso Odériz, Edgar Mendoza, and Rodolfo Silva

Estimation of Wave Transmission of Five-Layer Cubipod Homogeneous Low-Crested Structures 5951
Jorge Molines, Sergio Lozano, Patricia Mares-Nasarre, M. Esther Gómez-Martín and Josep R. Medina

Uncertainties of the Actual Engineering Formulas for Coastal Protection Slopes. The Dimensional Analysis and Experimental Method 5958
Miguel Santamaría, Pilar Díaz-Carrasco, M[a] Victoria Moragues, María Clavero, and Miguel À. Losada

Characterizing Live Vegetation Response to Wave Forcing: A Prototype-scale Flume Experimental Program 5965
Acacia Markov, Ross Henteleff, Jacob Stolle, Ioan Nistor, Enda Murphy, and Andrew Cornett

Laboratory Investigation on Armour Stability for Extremely Shallow Water Conditions 5973
Stefano Marino, Giulio Scaravaglione, Antonio Francone, Nico Valentini, Alessandra Saponieri, Leonardo Damiani, Marcel R. A. van Gent, and Giuseppe Roberto Tomasicchio

Comparative Analysis of Available Wave Hindcast Models for the North Sea and their Influence on the Design of Offshore Scour Protections 5980
Rui Figueiredo, Tiago Fazeres-Ferradosa, João Chambel, Paulo Rosa Santos, and Francisco Taveira Pinto

UAV-based Remote Sensing Practices for Assessing Coastal Vulnerability 5988
Christina N. Tsaimou, Panagiotis Sartampakos, and Vasiliki K. Tsoukala

7.6. From the inner shelf to the coastal zone: ecosystem challenges in a changing climate

Exchange of Biogeochemical Properties between the Guadalquivir River Estuary and its Inner Shelf 5997
María Ángeles Serrano, Manuel Díez-Minguito, Isabel Caballero, and Gabriel Navarro

Dynamics of Algal Blooms as Revealed by Continuous Machine-learning based Automatic Species Detection and Water Quality Monitoring in Sub-tropical Marine Fish Culture Zone 6006
Yaoyao Ma, Lu Chang, and Joseph H. W. Lee

7.7. From Snow to Sea: the future of the mediterranean sea

Impacts of Climate Change on the Tourist-Carrying Capacity at La Playa Beach (Sardinia, IT) 6014
Andrea Sulis, Giovanni Manca, Oumeima Yezza, and Silvia Serreli

8. Extreme events: from droughts to floods

8.1. Droughts prediction and management; impacts of climate change

Development of Analogue-based Downscaling Method for Drought Prediction in Context of Climate Change 6019
Seon-Ho Kim and Deg-Hyo Bae

©2022 IAHR. Used with permission / ISSN-L 2521-7119

A Model-Based Framework for the Estimation of the Self-Purifying Capacity of Intermittent Streams Under a Changing Climate 6028
Michael Tritthart, Daniel Wildt, and Gabriele Weigelhofer

Identification of River Water Temperature Vulnerable Sections for Meteorological Drought 6033
Jiyu Seo, Jeongeun Won, and Sangdan Kim

Development of Non-stationary Evaporative Demand Drought Index (NEDDI) for Drought Monitoring in Changing Climates 6040
Jeongeun Won, Jiyu Seo, and Sangdan Kim

Calibration Approaches for Hydraulic River Models for High and Low Flows: A Review 6047
Parisa Khorsandi Kuhanestani, Anouk Bomers, Martijn J. Booij, Jord J. Warmink, and Suzanne J. M. H. Hulscher

Predictability of Ecuadorian Seasonal Streamflow in a Changing Climate 6053
Cesar Quishpe-Vásquez, Matilde García-Valdecasas-Ojeda, Emilio Romero-Jiménez, Juan José Rosa-Cánovas, Patricio Yeste-Donaire, Yolanda Castro-Díez, María Jesús Esteban-Parra, and Sonia Raquel Gámiz-Fortis

Assessing the Predictive Skill of Drought with High-Resolution Decadal Climate Predictions in the Iberian Peninsula 6062
Juan José Rosa-Cánovas, Matilde García-Valdecasas Ojeda, Emilio Romero-Jiménez, Patricio Yeste, César Quishpe-Vásquez, Sonia R. Gámiz-Fortis, Yolanda Castro-Díez, and María Jesús Esteban-Parra

The Role of Dams for River Ecosystem Restoration and Managing Environmental Drought 6071
Joo-Heon Lee, Jong-Suk Kim, Seo-Yeon Park, and Young-Jun Park

Analysis of the Relationship between Meteorological and Hydrological Droughts in the Guadalquivir River Basin 6075
Emilio Romero-Jiménez, Matilde García-Valdecasas Ojeda, Patricio Yeste, Juan José Rosa-Cánovas, María Jesús Esteban-Parra, Yolanda Castro-Díez, and Sonia Raquel Gámiz-Fortis

Future Changes in Drought Characteristics over the Iberian Peninsula 6084
Matilde García-Valdecasas Ojeda, Juan José Rosa-Cánovas, Emilio Romero-Jiménez, César Quishpe-Vásquez, Patricio Yeste, Yolanda Castro-Díez, María Jesús Esteban-Parra, and Sonia Raquel Gámiz-Fortis

Multi-scale Analysis for Different Type of Drought in Temperate Climatic Conditions 6092
Ionut Minea, Marina Iosub, and Daniel Boicu

Spatio-temporal Characteristics of Extreme Rainfall Events in India and Possible Connection with the Large-scale Coupled Atmospheric-Oceanic Circulations 6100
Riya Dutta, Subhasmita Dash, and Rajib Maity

Time-Varying Characteristics of Droughts: A Modelling Scheme with Temporal Networks for Future Assessment 6107
Rajib Maity and Riya Dutta

High Resolution Decadal Predictions Analysis of Drought Events in Colombia 6115
Yenny Marcela Toro Ortiz, Sonia Raquel Gámiz Fortis, Yolanda Castro Díez, Reiner Palomino Lemus, Samir Córdoba Machado, and María Jesús Esteban Parra

Return Period of Low Water Periods in the River Rhine 6123
Saskia H. van Brenk, Lieke R. Lokin, Jord J. Warmink, and Suzanne J. M. H. Hulscher

Assessment of the Impact of Climate Change on Standardized Precipitation, Evapotranspiration and Groundwater Indices in Semi-Arid Tunisia 6133
Emna Gargouri-Ellouze, Fairouz Slama, Ronald van Nooijen, Alla Kolechkina, Changrang Zhou, and Hamouda Dakhlaoui

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Comparison and Assessment of Drought Indices on National Scale: Case of Study Mozambique 6139
Ronnie J. Araneda Cabrera, María Bermúdez, and Jerónimo Puertas

Spatial-temporal Variation of SST in the East China Sea from 1982 to 2022 6149
Yuan Cao, Deyu Zhong, and YingLin Tian

Secondary Drivers of Drought in Subhumid-Semiarid Environments: A Case Study in the Upper Duero 6156
Jaime Gaona

Application of Machine Learning Techniques for Water Resources Forecasting in Surface and Groundwater Systems. Demostration Pilots in Mediterranean and Snow-dominated Basins 6165
Lupicinio García, Miguel Ángel Díaz, Francisco Núñez, Damián Sánchez, Manuel Argamasilla, Ana Genaro, Juan Antonaya, and Eduardo Bustos

Forecast System Implementation in the Paraná Delta 6171
Santiago Guizzardi, Juan Bianchi, Julián Evaristo Cortese, Marcelo Uriburu Quirno, and Martin Sabarots Gerbec

Innovative Global Drought Monitoring and Early Warning for Robust Drought Risk Management 6181
Bertrand Richaud, Jeroen Van Dalen, and Daniel Tsegai

8.2. Tsunamis, storm surges and effects of tropical storms under rising sea levels

Can Asteroids Determine a Tsunami on European Atlantic Coasts? 6189
Damien Violeau

Experimental Investigation of Beach Slope Effects on the Kinematic Behaviors of Dam Break Flow 6194
Shilong Liu, Ioan Nistor, Abodolmajid Mohammadian, and Amir Azimi

Effects of Climate Change on the Sea Levels Along the Uruguayan Coast 6203
Michella Jackson, Mónica Fossati, and Sebastián Solari

Numerical Modeling of the Tsunami Generated by a M8.5 Magnitude Earthquake in the District of Chorrillos, Lima – Perú 6213
Julio César Martínez Herrera and Samuel Ismael Quisca Astocahuana

Numerical modelling of storm surge for Yaas cyclone in Bay of Bengal 6220

Analytical Criteria for Choosing between Vector and Scalar 3D Flow Modelling 6535
Alastair Barnett

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Changes in Spectral Response of Urban Areas Damaged by Flood: A Study Case in Belo Horizonte City (Brazil) 6545
Cibele Patrícia Damasceno de Oliveira, Ana Carolina Pires Pereira, Rafaela Alves de Carvalho, Hugo Henrique Cardoso de Salis, and Talita Fernanda das Graças Silva

A New Approach for the Determination of Best Field Measurement Points to Estimate Manning's Roughness Coefficient in Natural Rivers 6555
Mohammad Attari, Mostafa Taherian, and Abdolmajid Mohammadian

Assessing the Sensitivity of a Coastal Flood Model Designed for an Awareness System 6561
Marine Le Gal, Tomas Fernandez-Montblanc, and Paolo Ciavola

Developing 3-D Numerical Flood Flow Model for Vegetated Rivers: A Case Study for Lower Asahi River Flooding in Japan 6567
Md. Touhidul Islam, Keisuke Yoshida, Yuki Kajikawa, and Satoshi Nishiyama

Communicating and Transferring Large Sets of Flood Model Results for Both the Lay Reader and Experts 6572
Mikayla Ward, Mark Babister, and Monique Retallick

Flexible Adaptation Strategies to Coastal Flooding Enhanced by Climate Change in Macaronesia Coastal Urban Areas 6582
Javier L. Lara, Alberto Fernandez, David Lucio, D., Adela Machado, Pedro Luis Rodriguez, Raquel de la Cruz-Modino, Gustavo Herrera, Laura Comes, Inigo Losada, and Antonio Tomas

A Computational Approach to Mitigate Floods and Soil Erosion in Olive Orchard Catchments Through Nature-Based Solutions 6591
Patricio Bohorquez, Francisco José Pérez-Latorre, Raquel Jiménez-Melero, and Gema Parra-Anguita

An Integrated Model for Runoff, Flow, and Asset Degradation in UK Railway Drainage Systems 6601
Yiqi Wu, Simon Tait, Andrew Nichols, and Jamil Raja

Rational Evaluation of Flow Rate by Rainfall Considering Flood Arrival Time in Yamato River Basin under Climate Change 6608
Daiki Omori, Akira Kurihara, and Koji Tanaka

Dam-Breach Flood Wave Attenuation Along a River 6617
Francesco Macchione, Andrea Antonella Graziano, and Domenico Ferraro

The Inclusion of "Associated Events" in Basin Scale Flood Modeling: the case of Clogging and Breakage at a Bridge and its Consequences on Flood Dynamics 6623
Margherita Lombardo and Francesco Macchione

Effects of Anthropic Changes on the Propagation of the Gleno Dam Break Wave in the Valle Camonica Floodplain 6631
Gabriele Farina, Bonomelli Riccardo, and Marco Pilotti

Assessment of Flood Hazard Caused by Overtopping of a Dam 6638
Kutay Yilmaz and Cagri Hasan Karaman

A European Coastal Storm Impact Database of Resources: the ECFAS Effort 6646
Paola Souto Ceccon, Enrico Duo, Paolo Ciavola, Juan Montes Pèrez, Tomàs Fernàndez Montblanc, and Clara Armaroli

The MOVIDA Project to Support the Update of Flood Risk Maps in the Po River District: Methodology for Flood Damage Assessment 6653
Francesco Ballio, Clara Armaroli, Marcello Arosio, Chiara Arrighi, Enrico Borgogno-Mondino, Francesca Carisi, Fabio Castelli, Paolo Ciavola, Silvia De Biaggi, Gianni Di Pietro, Alessio Domeneghetti, Enrico Duo, Gabriele Farina, Alice Gallazzi, Federica Ghilardi, Riccardo Giusti, Mohammed Hammouti, Fabio Luino, Mario L. V. Martina, Daniela Molinari, Beatrice Monteleone, Natasha Petruccelli, Marci Pilotti, Anna Rita Scorzini, Tommaso Simonelli, Simone Sterlacchini, Laura Turconi, Cesare Vasini, Marco Zazzeri, and Laura Zoppi

Machine Learning for Data Driven Management of Uk Railway Drainage Infrastructure 6658
Ehsan Kazemi, Yiqi Wu, Andy Nichols, Simon Tait, and Jamil Raja

Phenomenological Differences Between Snow-Influenced and Rainfall-Driven Floods in Northern Iberian Peninsula 6664
Montes J., Bermúdez M., Puertas J., and Álvarez M.

A New Methodology for the Assessment of Flood Hazard in Urban Areas Due to Levee Breaches 6672
Vito Bacchi, Cédric Goeury, Fabrice Zaoui, Kamal El Kadi Abderrezzak, Sophie Bacchi, and Sara Pavan

The Development of a Fast-Computing Emulator to Predict Dike Failure During Severe Flood Events 6680
Anouk Bomers, Leon S. Besseling, and Suzanne J. M. H. Hulscher

Research on Practical Predictions of Dam Inflow Based on the Sparse Modeling Method 6688
Makoto Nakatsugawa, Tomohiro Sando, and Yosuke Kobayashi

Prediction of Dam Reservoir Level and Downstream River Level as Influenced by Discharge Based on a Machine Learning Method 6698
Shoma Wakasaya, Makoto Nakatsugawa, Yosuke Kobayashi and Tomohiro Sando

Evaluating The Risk of Erosion from Steep-Slope Rivers Using Downscaled d4PDF Data 6708
Tsubasa Kawai, Makoto Nakatsugawa, and Junya Seki

Frequency of Emergency Discharge Operation of Dams in Snowy Regions Considering the Uncertainty of Heavy Rain 6718
Seren Nishijima, Makoto Nakatsugawa, and Tomohiro Sando

Towards the Assessment of the Flood Attenuation Potential of Italian Dams: First Steps And Sensitivity to Basic Model Features 6728
Giulia Evangelista, Paola Mazzoglio, Francesca Pianigiani, and Pierluigi Claps

Multiple Reservoirs Effect on Flood Frequency at the Catchment Scale 6737
Stefano Cipollini, Aldo Fiori, and Elena Volpi

Disaster Investigation and Modelling Analysis of Extreme Flash Flood in Wangzongdian County, Henan Province, China 6741
Qiang Ma, Sijia Hao, Wangyang Yu, Lin Sun, Yizhu Lu, Wenlong Song, and Changjun Liu

Assessment of Climate Change Effect on the Extreme Flooding of Yodogawa River Basin 6745
Kenichiro Kobayashi

Territorial Planning in Mediterranean High-risk Flooding Areas: Hydrological and Hydraulic Aspects for the Implementation of the European Floods Directive in the Jucar River Basin in Spain 6749
Amparo Sanchis Plasencia, Onofre Gabaldó Sancho, and Alfonso Cavallé Garrido

Implementation of the European Flood Directive in Urban Areas at High Risk of Flooding in the Júcar River Basin in Spain: The Case of the Poyo and Picassent Gullies 6758
Ángeles Díaz Cano, Cristina Puertes, Félix Francés, and Onofre Gabaldó Sancho

Applications of Non-Structural Measures and Self-Protection Against Flood in Urban Areas in Taiwan and in France 6768
Hao-Ming Hsu and Philippe Gourbesville

Design Aspects of an Early Warning System for Flash Floods: The Case of the Town of Mandra in Attica, Greece 6777
Mitsopoulos George, Bloutsos Aristeidis, Panagiotatou Elpida, Evangelos Baltas, and Stamou Anastasios

Deterministic Modelling for Extreme Flood Events – Application to the Storm Alex 6787
Philippe Gourbesville and Masoud Ghulami

Wave-induced Flooding Risk Assessment for the Development of Early Warning Systems 6796
Juan L. Garzon, Oscar Ferreira, Andreia Ferreira, and Conceição J. E. M. Fortes

Flood Hazard Probability Prediction using Rainfall Index and Ensemble Forecast Rainfall Data for Each River System in Japan 6803
Takehiko Ito, Koyo Ota, and Yasuo Nihei

Comparison of Different Methodologies for Flood Risk Assessment, Key Study of Zujevina River 6812
Hadžić Emina, Aronica Tito Giuseppe, Milišić Hata, McCarthy Simon, Viavattene Christophe, Deda Miranda, and Binesh Negin

Horizontal 2d Flood Simulation on Flooding and Vehicle Stability at Car Accidents 6822
Nozomi Yusa, Nanako Utsugisawa, Koyo Ota, Takehiko Ito, Yuki Ogata, Shiho Onomura, and Yasuo Nihei

Fluid-Structure Interaction of a Partially Submerged Body: An Analytical Model for the Human Stability in Floodwaters 6829
Matteo Postacchini and Gianluca Zitti

A Comparative Study of two Flood-prone Communities against River Flooding: Berat (Albania) and Sarajevo (Bosnia) 6835
Negin Binesh, Giuseppe T. Aronica, Emina Hadzic, Fehad Mujić, Miranda Deda, Laura Rosselo, Halim Koxhai, Simone Gabellani, Rocco Masi, Christophe Viavattene, Simon Mccarthy, and Giuseppina Brigandi

A Comparative Assessment of Rheological Laws for Mud Flows 6843
Filippo Mauro, Alessandro Leonardi, Michele Iervolino, and Marina Pirulli

Assessment of Flood Damages Using Building Footprint Data 6848
Mustafa S. Altinakar, Molly Finster, Kyle Pfeiffer, and Preston Wilson

Methodologies and Tools to Cope with Climate Change in Urban Areas. The RESCCUE Project 6858
Beniamino Russo, Angel Villanueva Blasco, Montse Martinez Puentes, and Andrea Paindelli

Scenarios Definition for Extreme Rainfall Events Based on a Combination of Field and Satellite Rainfall Data 6866
Gogoua Habib Gogoua, Franziska Tügel, and Reinhard Hinkelmann

Development of the Methodology for the Design Hydrograph Estimation in Slovenia, Europe 6877
Nejc Bezak, Matjaž Mikoš, Klaudija Lebar, and Mojca Šraj

Integrated Cost-Benefit Analysis and Prescriptive Decision Tree Model for a Flood Risk Management Problem 6886
Jacopo Napolitano, Massimo di Francesco, and Giovanni M. Sechi

POLDER2C'S LIVING LAB: Toolbox for a Better Future of Levee Management 6894
Jadon Beerlandt, Pieter Rauwoens and George Anoyatis

Hidralerta System. Validation with Elsa and Fabien Depressions 6899
Conceição J. E. M. Fortes, Liliana V. Pinheiro, Ana Catarina Zózimo, and Joao Alfredo Santos

On The Effectiveness of Contrasting Typologies of Management Measures in Flood Risk Reduction 6909
Sergio Salazar-Galán and Félix Francés

New Approach to Estimate Extreme Flooding Using Continuous Synthetic Simulation Supported by Regional Precipitation and Non-Systematic Flood Data 6916
Carles Beneyto, José Ángel Aranda, Gerardo Benito, and Félix Francés

TESLA 2.0: A Climate-Based Emulator of Met-Ocean Parameters for the Analysis of Coastal Flooding Risk in Small Islands affected by Extra-Tropical and Tropical Cyclones 6926
Fernando J. Méndez, Laura Cagigal, Alba Cid, Ana Rueda, Alberto Luceño, Sonia Castanedo, Beatriz Pérez, Nicolás Ripoll, Sara O. van Vloten, Manuel Zornoza, Alba Ricondo, Javier Tausía, Andrea Pozo, and Israel Rubio

Nature-Based Solutions to the Sustainable Management of Climate Change Impacts, Flooding, and Drought- Literature Review 6930
Tassew Mekuria, Peter Goodwin, Fredrika Moser, Cindy Palinkas, and Ming Li

©2022 IAHR. Used with permission / ISSN-L 2521-7119

8.4. Urban flood management

Calculate of Design Floods in the Tonala River Basin using a Regional Analysis of Rainfall and a Distributed Rainfall-Runoff Model 6938
Eduardo Juan Diego, Ramón Domínguez Mora, Eliseo Carrizosa Elizondo, Gabriela Esquivel Garduño, Andrés Olaf Santana Soto, and Maritza L. Arganis Juárez

Influence of SUDS Allocated Area on Runoff Reduction in Developing Urban Catchments: a Case Study in San Sebastian (Spain) 6948
Eneko Madrazo-Uribeetxebarria, Maddi Garmendia Antín, Jabier Almandoz Berrondo, and Ignacio Andrés-Doménech

Management of Urban Floods Based on Tolerable Consequences in an Uncertain Future 6955
Salar Haghighatafshar, Per Becker, Steve Moddemeyer, Andreas Persson, Johanna Sörensen, Henrik Aspegren and Karin Jönsson

Runoff Coefficients Associated with Different Return Periods Calculated by Means of Statistical Analysis 6964
Mauricio Guillermo Ramirez Ambriz, Ramón Dominguez Mora, Maritza Liliana Arganis Juarez, and Eliseo Carrizosa Elizondo

Influence of Building Positioning on Flow Processes in Urban Flooding: Computational Modelling and Laboratory Experiments 6974
Xuefang Li, Sébastien Erpicum, Valentin Scheen, Emmanuel Mignot, Pierre Archambeau, Michel Pirotton, and Benjamin Dewals

Floods in Housing Estate : Some Experimental Data 6981
Frédérique Larrarte, Augustin Doumic and Nicole Goutal

New Dynamic Data-Driven Model for Predicting the Apparent Shear Force and Discharge of Compound Channels 6987
Xiaonan Tang, Prateek Singh, and Yutong Guan

Innovative Tools for Urban Flood Management – A Brief Overview of 2D-Hydrodynamic Modeling and how to possibly Overcome its Limitations in Extreme Flood Management in Urban Areas by Artificial Intelligence 6994
Frederik De Vos, Markus Reisenbüchler, and Anna Kruspe

Assessing the impact of climate change on fluvial flood losses in urban areas. The case study of Pamplona (Spain) 7000
Enrique Soriano, Kai Shröter, Sophie Ullrich, David Santillan, Luis Cueto-Felgueroso, Marco Lompi, and Luis Mediero

Parameterization of Flow Resistance for Hydrodynamic Numerical Simulation of Sheetflow 7009
Tim Kerlin, Peter Oberle, Andreas Kron, and Mário J. Franca

Protecting Heritage Cities from Pluvial Flooding: The Santa Croce District in Florence 7019
Paolo Tamagnone, Enrica Caporali, and Alessandro Sidoti

DEUFI Project for Accurate Urban Flood Risk Assessment 7027
André Paquier, Bruno Bader, Olivier Bertrand, Guilhem Dellinger, Benjamin Dewals, Pascal Finaud-Guyot, Frédéric Grelot, Emmanuel Mignot, Sébastien Proust, Dong Sop Rhee, and Freddy Vinet

Modelling Strategy for Multi Purposes Management in a Mediterranean Ungauged Catchment – Application to the Paillons Catchment, France 7035
Paguédame Ibrahim Game, Philippe Audra, Philippe Gourbesville, and Mingyan Wang

Impacts of Climate Changes on Coastal Urban Flooding 7044
Jennifer Kirkpatrick, Stephen Nash, Michael Hartnett, and Agnieszka Indiana Olbert

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Prioritization of Infrastructures' Criticality: A Multi-criteria Decision Analysis vs. Using Vulnerability Curves 7051
Negin Binesh, Giuseppe T. Aronica, Emina Hadžić, Suada Sulejmanović, Hata Milišić, Miranda Deda, and Halim Koxhai

Prediction of Urban Flooding Risks Using High-resolution Modeling and Hybrid Rainfall Data 7055
Hao Luo, Scott M. Collis, Irene A. Crisologo, Daniel E. Horton, Aaron Packman, and Marcelo H. Garcia

Characteristics of Air-Water Bubbly flow in the Urban Deep-Tunnel Drainage System 7066
Zhigang Wang, Dong Zhang, Hongwei Zhang and Weichen Ren

Impacts of Topographic Resolution on Deterministic Hydrological and Hydraulic Models – Application to Cagne Catchment, France 7072
Mingyan Wang, Philippe Gourbesville, and Paguedame Game

Spatial and Temporal Variability of Weather Data for Modeling Urban Hydrology 7078
Sergio Zubelzu, Sara E. Matendo, Victor Galán, Andrea Zanella, and Mehdi Bennis

Evaluating Empirical and Mechanics-based Pedestrian Stability Models 7087
Man Yue Lam, Reza Ahmadian, Charles West, Maria Pregnolato, Barry Evans, Albert S. Chen, and Slobodan Djordjevic

Analytical Probabilistic Model Incorporating Parameter Adjustment for Stormwater Runoff in South Korea 7097
Moonyoung Lee, Heejin An, Seol Jeon, Siyeon Kim, Kichul Jung, Myoung-Jin Um, and Daeryong Park

Numerical Simulation of the Coastal Flooding in Urban Centres with Underground Spaces 7103
Yong Peng, Ulrich S. Ofterdinger, Aaron Miller, John Meneely, Jennifer McKinley, Debra Laefer, and Michela Bertolotto

Use of Social Media Crowdsourcing Data for Pluvial Flood Modelling Development, Calibration and Validation. The CRISI ADAPT 2 Project 7110
Beniamino Russo, Andrea Paindelli, Daniel Yubero Pena, and Luca Locatelli

Exacerbation of Hydrologic Events due to Anthropogenic Causes in Arid Zones 7121
Edwin Pino, Julio M. Kuroiwa, Eduardo Chavarri, and Walter Chuan

Early Warning and Emergency Management Support System at a Municipal Level for Extreme Climate Events Management 7130
Simón José Pulido Leboeuf, Ramón Bella Piñeiro, Alvaro Rodríguez García, Marcos Antonio Martínez Martínez, and Ana Raquel Genaro Moya

Stormwater Runoff Assessment Under Climate Change Scenarios Using Remote Sensing Products. A Case Study in Piura, Peru 7139
Pedro Rau, Nadia Callan, Wilder Abad, and Kimberly Visitación

8.5. Flood recovery and resiliency

How Accurate do Flood Maps Need to be to be Useful? 7147
Monique Retallick, Mark Babister, and Behzad Jamali

8.6. Impact of global change on extreme environments (cold/arid regions)

ENSO and Sea Surface Temperature Anomaly Impacts on Streamflow Data in the North Pacific Coast Catchments of Peru 7157
Leonardo Castillo, Pedro Rau, and Jaime Luyo

Enhanced Resolution Mapping of Surface Melting Over the Greenland Ice Sheet (1979 – 2019) from Spaceborne Passive Microwave Observations 7169
Paolo Colosio, Marco Tedesco, and Roberto Ranzi

©2022 IAHR. Used with permission / ISSN-L 2521-7119

Simulating the Hydrological Regimes of the Snow fed and Glacierized Naltar Catchment (Pakistan) Using a Distributed Energy Balance Model 7175
Muhammad Usman Liaqat and Roberto Ranzi

Analysis of Rainfall in The Upper Jeneberang River Basin, South Sulawesi, Indonesia 7179
Ayuko Hirani Saleh, Akira Tai, Mukhsan Putra Hatta, and Shinichiro Yano

Global Warming Impacts on the Shifting to Arid Climates in Asia based on CMIP6 Projections 7189
Jeong-Bae Kim and Seon-Ho Kim

Assessment of Extreme Flash Floods in a Semiarid Basin: Case Study of Albujon Basin in South East of Spain 7196
García-Galiano, S. G., Tavárez-Polonia, C., Cánovas-García, F., and Erena-Arrabal, M.

Assessment of Groundwater Recharge Rates Under Projected Climate Change in Arid and Semiarid 7201
Fairouz Slama, Hamouda Dakhlaoui, Emna Gargouri-Ellouze, Ons Sidhom, Nessrine Zemni, Fethi Bouksila, Imen Hassen, and Rachida Bouhlila

8.7. Adaption to climate change: guidance to engineering design

Analysis of Rainfall Quantile Based on Shared Socioeconomic Pathways (SSPs) Scenarios in South Korea 7207
Sunghun Kim, Sung-hack Lee, Taewon Lee, and Jun-Haeng Heo

Sea Level Change Adaptation Policies and Implementation Framework for U. S. Federal Projects 7213
Mustafa Samad

Understanding Compound Wave Extreme Events at Coastal Areas in a Changing Climate 7221
David Lucio, Javier L. Lara, Íñigo J. Losada, and Antonio Tomás

Assessment of the Impact of Climate Change on Hydrological Safety of Dams with Gated Spillways 7227
Enrique Soriano, Andrea Petroselli, Davide Luciano De Luca, Ciro Apollonio, Salvatore Grimaldi, and Luis Mediero

A Stochastic Methodology to Assess the Impact of Climate Change on the Eugui Hydrological Dam Safety (Spain) 7237
Marco Lompi, Luis Mediero, Enrique Soriano, and Enrica Caporali

Adaptation Planning of Regional Ports based on a Multi-hazard Climate Change Risk Assessment 7242
Fernandez A., Lara J. L., Lucio D., and Losada I. J.

Performance Assessment of Coastal Hydraulic Structures: Influence of Sea Level and Tidal Variations 7252
Priyank J. Sharma, Ramesh S. V. Teegavarapu, and Tibebe Dessalegne

Flood Hazard Mapping for the Benin Electricity Access Scale-up Project 7258
Els Van Uytven, Antoine de Wasseigne, Thu Zar Aung, Luciana das Neves, Florian Sparavier, Sébastien Leyder, Miarintsoa Vonjy Rakotondramanana, Celine Ramstein, and John Donald Rennie

Resilience of the Urban Drainage System In Brescia (Northern Italy) to Climate Change: A Preliminary Analysis 7268
Dada Arianna, Leoni Paolo, Berteni Francesca, and Grossi Giovanna

Parametric Characterization of Wave Climate along the Andalusian Coast for Non-Stationary Stochastic Simulation 7276
Manuel Cobos, Pedro Magaña, Pedro Otiñar, and Asunción Baquerizo
