

IAHR IWHR BEIJING YOUNG PROFESSIONALS NETWORK

2022 Annual Report of Activities

IWHR Beijing
**Young
Professionals
Network**

1. Our vision and mission

IAHR IWHR YPN established was established on April 12, 2011. During the period of more than eleven years, the executive committees and members have been committed to the development of IAHR IWHR YPN. On the one hand, we continue to create more learning opportunities for members, and on the other hand, we have also organized some activities to strengthen the cohesion. Currently, there are 247 members of IAHR IWHR YPN, covering master students, doctoral students and some young professionals.

IAHR IWHR YPN is committed to providing a good communication platform, enabling students to broaden horizons, increase communications and show themselves among graduate students, various universities and on the international stage. We are committed to making efforts for the majority of young professionals to improve their scientific research and keep up with the frontiers and development trends of their professional areas.

2. Main goals and key objectives in 2022

Due to the outbreak of COVID-19, many of the originally planned face-to-face communication events had to be cancelled in 2022. So the main objective has been changed to provide services such as communication activities and academic guidance for graduate students and young professionals through online conferences, combining the discipline characteristics and training goals of IWHR.

3. Activities in 2022
