

# IAHR [SCU] Young Professionals Network

2023 Annual Report  
of Activities

---

**Young  
Professionals  
Network**

*Hosted by*  
Spain Water and IWHR, China

## 1. Our vision and mission

IAHR Branch of Sichuan University was established in 2003. As one of the student branches of IAHR, it aims to provide teachers and students of Sichuan University with cutting-edge information in river and ocean dynamics, water resources development, eco-hydraulics, ice engineering, hydroinformatics, and other professional fields

## 2. Main goals and key objectives in 2023

IAHR Sichuan University Branch is an academic association with the following objectives: ① To encourage and support members to participate in activities related to hydraulics and expand hydraulic professional knowledge. ② To strengthen the contact with members, increase the contact with domestic water conservancy colleges and international water conservancy organisations, and broaden the vision of members. ③ To provide members with an international platform and opportunities to contact experts and scholars at home and abroad.
