Average

Length: 50–150 pages

Format: online and print version on demand

Access: The monographs are published in an Open Access format, making them freely available to the global community.

Copyright: Licensed under Creative Commons.

Scope:
Focused topics.
Concise style.

Target readership:
Researchers and professionals.
Groups involved in research, education and development.

FACTS & CONTEXT

This series represents a significant advancement in IAHR's mission as a longstanding international organization.

OPEN ACCESS, rooted in the Open Science movement, ensures that research is freely available, boosting visibility and impact for a more collaborative and promising future

IAHR WATER MONOGRAPHS PROCESS

01. Proposal Submission

Authors begin by submitting a proposal form to the **IAHR Water Monographs Task Force** for approval.

02. Manuscript Preparation

Authors can choose between a Word or LaTeX template for their manuscript.

03. Submission

Focus on creating a clear and consistent manuscript, ensuring proper units and equations for readability and accuracy. Final formatting and typesetting will be managed by IAHR upon acceptance.

04. Peer Review

Each manuscript is reviewed by three independent reviewers, coordinated by an Editor from the IAHR Water Monographs Task Force, who has no affiliation with the content.

05. Sponsorship

Authors' Publishing Charges are typically covered by a sponsoring company, institution, or funding source. In return, sponsors receive significant benefits associated with Open Access.

06. Design, Typesetting, and Proofreading

IAHR handles this process with high-quality standards until final confirmation before publication.

07. Publication Timeline

The average time from submission to publication is approximately six months. IAHR Water Monographs are published as Open Access, and printed copies can be ordered on demand.

08. Visibility

IAHR Water Monographs are promoted through various IAHR channels, including our website, targeted mailings to over 28,000 contacts and promotional activities at events. They are also indexed in Google Scholar.
