--Lab Research Assistant with PhD opportunity in River Hydraulics--

Description

The Hydraulic Engineering group at the University of Córdoba (Spain) is recruiting an engineer as technician to work within a 3-years research project on the hydraulics of river dike failure. The job is mainly laboratory-based, while other research duties to support the work of the principal investigators may be required.

The contract shall start 01/01/2026 and may last until 30/08/2028 if the probatory period is successfully evaluated.

Key dates:

- Internal application: 10/10/2025
- Official application (EU candidates): 20-27/10/2025
- Online Interviews successful applicants: 30-31/11/2025
- Notification of selection: 05/12/2025

Salary: around 1400€/month (to be defined in the official UCO offer).

Requirements

The candidate must hold an Engineering Degree (Civil, Agricultural, or related with strong background in open channel hydraulics).

Holding a Sci. or Eng. Master in a related hydraulic field is preferred.

PhD opportunity

There exist a PhD opportunity within the job. However, strong background in mathematics, physics and computer programming is necessary, while previous knowledge in open-channel hydraulics will be significantly considered.

Application
